SUBJECT INDEX

Absorption on diethylaminoethyl-Sephadex
—for isolation of Vi antigen from *E. coli*, 69
Adenylylating enzyme
—for inactivation of streptomycin and spectinomycin by *E. coli*, 109
Adjuvant activity
—of *B. pertussis* on primary and secondary immunization of mice, 251
Adrenalin
—effect on release of herpesvirus, 351
Aerosol challenge
—resistance in mice immunized by specific and nonspecific means, 274
D-Alanine
—for reversal of inhibition of wax D synthesis, 74
Alpha toxin
—effect of Enovid on, 157
Amantadine
—efficacy in epidemic influenza A_2, 200
Amino acids
—utilization by *M. tuberculosis* during growth, 513
Amphotericin B
—susceptibility of *C. neoformans* to, 128
Animal passage
—effect on arthritogenic properties of *M. arthritidis*, 538
Antibody production
—in endotoxin-treated rats, 135
Antibody response
—to single-factor O antigens of *Salmonella*, 41
Anticholeragen antibodies
—in vitro microtests for, 21
Antigenic diversity
—among group C strains of *N. meningitidis*, 479
Antigens
—of mycobacterial cell walls, 400
Anti-*Salmonella* immunity
—assessment in mice, 243
Antitoxic immunity
—in experimental cholera, 464, 468
—passive transference, 468
Arthritogenic properties
—of various *M. arthritidis* strains, 538
Aspergillus fumigatus spores
—interaction with human leukocytes and serum, 345

Bacterial antigens
—antibody response to, 219
Bacterial death
—mediated by complement, 51
Bacterial flagellar hook structures
—antigenic nature of, 212
Bacterial infection
—protection of mice against, 271
Bacterial plaques
—inhibition by polyphosphates, 604
Bacterial survival
—in diffusion chambers in a mammalian host, 211
Bactericidal reactions
—classification of *N. meningitidis* by, 479
Bactericidal substance
—effect on group A streptococci, 485, 491
Bacteriocin typing
—of *V. cholerae*, 293
Bacteriocins
—of *V. cholerae*, 293
Bacteriophage-associated materials
—production by *V. cholerae*, 417
Bacteriophage attachment
—to the somatic antigen of *Salmonella*, 88
Bacteriophage influence
—correlated with pathogenicity in *V. cholerae*, 417
Biochemical alterations
—in streptococci treated with bactericidal substance, 485
Biological degradation
—for hybridization of bacterial endotoxins, 15
Borate
—effect on coagulase-positive and -negative staphylococci, 78
Bordetella pertussis
—effect of killed cells on secondary immune response, 251
Bordetella pertussis vaccine
—adjuvant effect on primary and secondary immunization of mice, 251
Botulinum toxin
—dependence of time to death on molecular size, 423
Botulinum toxin type A
—molecular weight of, 205
Bovine gamma globulin
—resistance to *L. monocytogenes* induced by, 511
Brucella
—growth in normal and immune macrophages, 146
Brucella endotoxin
—structural and biological properties, 174
Brucellaceae
—relation between toxins of and endotoxins of *Enterobacteriaceae*, 174

"C" antigen
—from mycobacterial cell walls, 400
C5a
—major chemotactic factor in rabbit and guinea pig sera, 521
Candida stellatoidea antiserum
—precipitin inhibition of, 61
Canine cell line
—in study of minute virus of canines, 503
Canine mycoplasmas
—characterization of, 1
Canine pneumonia
—mycoplasma isolates from, 1
Capsule production
—by *C. neoformans*, 526
Carbenicillin
—increased resistance of *P. aeruginosa* to, 427
Carbohydrate metabolism
—in mice infected with *L. monocytogenes*, 183

Cardiotoxicity
—of *Listeria* hemolysin, 373
Cat herpesvirus
—chronic infections by, 351
Cell cultures
—interaction with staphylococcal enterotoxin B, 455
Cell wall mutants
—sensitivity to lysosomal fraction of polymorphonuclear leukocytes, 305
Cell wall structure
—role in interaction of bacteria with lysosomal fraction of polymorphonuclear leukocytes, 305
Cell wall tuberculins
—from mycobacterial cell walls, 400
Cellular factors
—role in production of osmotically sensitive *Brucella*, 146
Cellular immune response
—suppression by murine sarcoma virus (Moloney), 288
Chlamydia
—from the peritoneal cavity of mice, 64
—plaque formation in L cells, 259
Chlamydial agent
—causing polyarthritis of lambs, 499
Chloramphenicol
—induction of plaquelike clearings on lawns of *P. aeruginosa*, 190
Chlortetracycline resistances
—chromosomal versus R factor-mediated types, 321
Cholera
—antitoxic immunity in, 464, 468
Cholera enterotoxin
—in vitro detection of antibody to, 21
—method for purification, 546
Cholera patients
—detection of antibody to cholera enterotoxin in, 21
Cholera vaccines
—preparation of, 334
Cholera vibrio suspensions
—toxic components extracted with fluorocarbon, 334
Choleragen
—immunogenicity of, 464, 468
Choleragenoid
—immunogenicity of, 464, 468
Clostridium botulinum type A
—molecular weight of toxin from, 205
Clupeine
—for reversal of inhibition of polymorphonuclear leukocytic lysosomal proteins, 607
Coagulase-negative staphylococci
—effect of borate on growth, 78
Coagulase-positive staphylococci
—effect of borate on growth, 78
Colloids
—response of reticuloendothelial system to, 327
Complement
—bacterial death mediated by, 51
Conventional mice
—toxicity of nervous system drugs for, 139
Cryptococcosis
—role of nonencapsulated *C. neoformans*, 526
Cryptococcus neoformans
—nonencapsulated cells of, 526
—susceptibility to hamycin, amphotericin B, and 5-fluorocytosine, 128
Culture supernatant fluids
—of *E. rhusiopathiae*, protective activity, 380
D-Cycloserine
—wax D heteropolymer synthesis inhibited by, 74

Delayed hypersensitivity
—in mice vaccinated with *M. bovis* BCG, 587
—role in resistance of mice to infection with *M. tuberculosis* H37Rv, 595
Delayed paralysis
—second phase of reticuloendothelial paralysis, 327
Deoxycholate treatment
—for hybridization of bacterial endotoxins, 15
Deuterium-tolerant mutants
—of *P. tularensis*, 56
Dextran sulfate precipitation
—for purification of PF/cholera enterotoxin, 546
Diffusion chambers
—survival of *L. monocytogenes* in, 209
Diptheroids
—inhibition of plaques formed by, 604
D_2O
—effect on growth of *P. tularensis*, 56
Dogs
—characterization of mycoplasma isolates from, 1
—investigation of respiratory disease in, 503
Drug susceptibility testing
—rapid method of, 421

Endotoxin
—from *Brucella* species, 174
Endotoxin-altering fractions
—derived from normal serum, 431
Endotoxin coating of red cells
—inhibition of, 98
Endotoxin-treated rats
—natural and specific antibody production in, 135
Endotoxins
—hybridization of, 15
Enovid
—effect on staphylococcal alpha toxin, 157
Enteric infection
—mice immune to, 243
Enterobacteriaceae
—activity of minocycline against R factor-carrying strains, 321
—relation between endotoxins of and toxins of *Brucellaceae*, 174
Enterotoxin
—synthesized by L-forms of *S. aureus*, 169
Enzymes
—for expression of virulence in *P. pestis*, 446
Erysipelothrix rhusiopathiae
—characterization of protective antigen, 380, 387
—solubilization of protective antigen, 387
Erythrocyte membrane component
—endotoxin coating of red cells inhibited by, 98
Escherichia coli
—adenylylation of streptomycin and spectinomycin by, 109
—changes in cell envelope after interaction with

XUM

lysosomal fraction of polymorphonuclear leukocytes, 311
—intestinal strangulation in rats monocontaminated with, 195
—isolation of Vi antigen from, 69
Escherichia coli hybrids
—genetic and serological characterization, 279
Escherichia coli K-12
—genetic transfer of *S. flexneri* antigens to, 279
Ethyl alcohol precipitation
—for isolation of Vi antigen from *E. coli*, 69
Experimental animals
—toxic effects of *Listeria* hemolysin in, 363
Exposure to microorganisms
—effect on sensitivity of mice to nervous system drugs, 139

Flagella
—antigenic nature of hook structures, 212
Fluorocarbon
—for extraction of cholera vibrio suspensions, 334
5-Fluorocytosine
—susceptibility of *C. neoformans* to, 128
Formagen
—immunogenicity of, 468

Genetic transfer
—of *S. flexneri* antigens to *E. coli* K-12, 279
Genetron-113
—for extraction of cholera vibrio suspensions, 334
Germ-free mice
—toxicity of nervous system drugs for, 139
Germination assay
—to determine viability of *A. fumigatus* spores, 345
Glutamic-pyruvic transaminase activity
—enhancement by addition of rabbit serum, 215
Glycolipids
—role in serological activity of *M. pneumoniae*, 408
Gonococcal antigen
—important in human immune response, 207
Gram-negative bacteria
—changes in cell envelope after interaction with lysosomal fraction, 311
—interaction with lysosomal fraction of polymorphonuclear leukocytes, 305, 311
Group A streptococci
—effect of bactericidal substance from *S. aureus*, 485, 491
Group-specific antigens
—isolated from *N. meningitidis*, 8
Growth phase
—effect on serum susceptibility and virulence of *S. faecalis*, 532
Guinea pig serum
—generation of polymorphonuclear leukocyte chemotactic activity, 521

Haemophilus influenzae
—reversal of L-phase growth by spermine, 474
Hamycin
—susceptibility of *C. neoformans* to, 128
Hemolytic activity
—of *V. parahaemolyticus* and related vibrios, 394
Hemorrhagic intestinal strangulation
—in *E. coli*-monocontaminated rats, 195
Heparin inhibition
—reversed in polymorphonuclear leukocytic lysosomal proteins, 607
Herpes simplex virus
—chronic infections by, 351
Hexose monophosphate shunt enzymes
—function in phagocytizing cells, 338
H_2O_2
—function in phagocytizing cells, 338
Hong Kong influenza
—amantadine therapy of, 200
Hook structures
—of bacterial flagella, 212
Horse herpesvirus
—chronic infections by, 351
Horse serum α_2-macroglobulin
—isolation and properties, 431
Human immune response
—gonococcal antigen important in, 207
Human leukocytes
—fungicidal properties of, 345
—interaction with *A. fumigatus* spores, 345
Humoral antibody response
—suppression by murine sarcoma virus (Moloney), 288
Hypertonic sucrose
—effect on immune bactericidal reaction, 51

Immediate paralysis
—first phase of reticuloendothelial paralysis, 327
Immune bactericidal reaction
—effect of hypertonic sucrose, 51
Immune macrophages
—osmotically sensitive *Brucella* in, 146
Immunoadsorbent
—for isolation of *P. tularensis*-specific antibodies, 137
Immunoglobulin class
—of natural human antibodies reactive with *T. pallidum*, 555
Immunosuppression
—by murine sarcoma virus (Moloney), 288
Incubation in citrated serum
—for hybridization of bacterial endotoxins, 15
Influenza A_2
—amantadine therapy of, 200
Interferon inducers
—antibacterial effect of, 271
Intestinal strangulation
—in *E. coli*-monocontaminated rats, 195
Intracellular pathogen
—resistance to induced by bovine gamma globulin, 511
Intraintestinal blood
—effect on intestinal strangulation in *E. coli*-monocontaminated rats, 195
Intraperitoneal passages of liver and spleen
—for isolation of a *Chlamydia* from mice, 64
Ischemic intestinal strangulation
—in *E. coli*-monocontaminated rats, 195

Kauffmann-White factors
—agglutinin responses to, 41

Kinetic hemolysis data
—use of a logistic function in expressing, 142

L cells
—plaque formation by *Chlamydia* in, 259
L-forms
—prepared and isolated from *S. aureus*, 169
—synthesis of enterotoxin by, 169
L-phase growth
—protected against antibiotics by spermine, 474
—reversal by spermine, 474
Laboratory animals
—detection of antibody to cholera enterotoxin in, 21
Lambs
—chlamydial agent causing polyarthritis, 499
Leptospirae
—enhancement of glutamic-pyruvic transaminase activity, 215
Lethality
—in mice injected with *Listeria* hemolysin, 373
Ligated ileal loop model
—in studies of antitoxic immunity in cholera, 464
Lipid haptens
—identified in *M. pneumoniae*, 408
Lipopolysaccharide fraction
—of *Salmonella* O antigen, 219
Lipopolysaccharide protein fraction
—of *Salmonella* O antigen, 219
Lipopolysaccharide receptor
—activity range and mode of action, 98
Lipopolysaccharide structure
—role in phage attachment, 88
Lipopolysaccharides
—attachment to red cells, 98
Listeria monocytogenes
—mutation after survival in diffusion chambers, 209
—resistance to induced by bovine gamma globulin, 511
—sites of damage in mice infected with, 183
Listeria monocytogenes hemolysin
—biochemical and immunological effects, 363
—cardiotoxic and lethal effects, 373
—effects on phagocytic cells and lysosomes, 356
Listeria monocytogenes infection
—mechanisms of pathogenesis, 183
Listeric infection
—role of hemolysin during, 363
Listeriosis
—carbohydrate metabolism in mice during, 183
Liver of mice and rats
—*S. enteritidis* endotoxin in, 440
Logistic function
—use in expressing kinetic hemolysis data, 142
Lymphocyte-mediated immunity
—to tuberculosis, 600
Lysosomal fraction of polymorphonuclear leukocytes
—interaction with gram-negative bacteria, 311
Lysosomes
—effects of *L. monocytogenes* hemolysin, 356
Lytic factor
—production by *V. cholerae*, 80

α_2-Macroglobulin
—component of endotoxin-altering factor, 431
Macrophage migration inhibition studies
—with cells from mice vaccinated with *M. bovis* BCG, 587, 595
Mannan
—extracted from *C. stellatoidea*, 61
Marine vibrios
—differentiated from *V. parahaemolyticus*, 394
Meningococcal antigens
—isolation and characterization, 8
Meningococcal antisera
—microagglutination, gel diffusion, and slide agglutination studies of, 226
Meningococcal disease
—typing scheme for study of epidemiology, 479
Meningococcal fractions
—evaluation of antigenicity, 151
2-Mercaptoethanol-resistant antibody
—production in endotoxin-treated rats, 135
Mice
—antibody response to *N. meningitidis* antigens, 151
—for study of immunity to typhoid fever, 243
—immunity to enteric infection, 243
—isolation of a *Chlamydia* from, 64
—*S. enteritidis* endotoxin in liver and spleen, 440
—toxic effects of *Listeria* hemolysin in, 363
Microagglutination tests
—for studying *N. meningitidis* serogroups, 226
Microbial susceptibility testing
—rapid method of, 421
Migration inhibition
—of mouse cells, 587
—relationship to tuberculoimmunity, 595
Minocycline
—activity against R factor-carrying *Enterobacteriaceae*, 321
Minute virus of canines
—recovery and characterization, 503
Mouse cells
—migration inhibition of, 587
Mouse macrophages
—infection with *S. flexneri*, 459
—multiplication of *M. tuberculosis* within, 30
Mucinase
—production by *V. cholerae*, 80
Murine sarcoma virus (Moloney)
—immunosuppression by, 288
Mycobacterial cell walls
—antigens of, 400
Mycobacterial proliferation
—inhibition by streptomycin, 30
Mycobacterial proteins
—purification and characterization, 164
Mycobacterium bovis BCG
—resistance to salmonellosis in mice infected with, 583
—studies with cells from mice vaccinated with, 587, 595
Mycobacterium tuberculosis
—inhibition of wax D synthesis, 74
—multiplication within mouse macrophages, 30
—two proteins from culture filtrates of, 164
—utilization of amino acids during growth, 513

XUM

Mycobacterium tuberculosis H37Rv
—relationship of delayed hypersensitivity to resistance to, 595
Mycoplasma arthritidis
—differentiation of virulent and avirulent strains, 538
—effect of animal passage on arthritogenic properties, 538
Mycoplasma isolates
—from an investigation of canine pneumonia, 1
Mycoplasma pneumoniae
—role of glycolipids and phosphatidylglycerol in serological activity, 408
Mycoplasma pneumoniae disease
—protective effect of vaccines, 559
Myeloperoxidase
—function in phagocytizing cells, 338

Natural human antibodies
—reactive with *T. pallidum*, 555
Neisseria gonorrhoeae antigen
—important in human immune response, 207
Neisseria meningitidis
—classification by bactericidal reactions, 479
—isolation of polysaccharide antigens from, 8
—relationship of serogroups, 226
Neisseria meningitidis antigens
—antibody response of mice to, 151
Nervous system drugs
—enhanced toxicity for germ-free mice, 139
Neuraminidase
—of *P. hemolytica*, 319
—of *P. multocida*, 319
—production by *V. cholerae*, 80
Nitrogen sources
—effect on growth of two mycobacteria, 513
Nonspecific immunization
—extent of resistance induced by, 274
Normal macrophages
—osmotically sensitive *Brucella* in, 146
Normal serum
—endotoxin-altering fractions derived from, 431

O-specific structures
—effect on phage attachment to *Salmonella*, 88
Ocular lesions
—produced by trachoma agent in rabbits, 566
Oligosaccharides
—precipitin inhibition of *C. stellatoidea* antiserum with, 61
Oral immunization
—against experimental salmonellosis, 263
Ovine chlamydial polyarthritis agent
—ultrastructure and development, 499

Parasite
—role of physicochemical state in infection, 532
Parenteral challenge
—resistance in mice immunized by specific and nonspecific means, 274
Passive hemagglutination microtest
—for anticholeragen antibodies, 21
Passive hemolytic plaque assay
—for evaluating antigenicity of meningococcal fractions, 151
Pasteurella hemolytica
—neuraminidase of, 319.
Pasteurella multocida
—neuraminidase of, 319
Pasteurella pestis
—interconversion of purine mononucleotides, 446
Pasteurella tularensis
—effect of D_2O on virulence, 56
—isolation of a deuterium-tolerant mutant, 56
—preparation of purified antibodies to, 137
Pathogenicity
—correlated with phage influence in *V. cholerae*, 417
Penicillin therapy
—relation to viability of spheroplasts in urine, 300
PF/cholera enterotoxin
—purification and biological properties, 546
*p*H
—effect on lytic activity of *Listeria* hemolysin, 356
*p*H of urine
—effect on viability of spheroplasts in, 300
Phagocytic cells
—effects of *L. monocytogenes* hemolysin, 356
—function of H_2O_2, myeloperoxidase, and hexose monophosphate shunt enzymes in, 338
Phagocytosis
—effects of streptococcal cell wall fragments, 232
—of *S. flexneri* by mouse macrophages, 459
Phosphatidylglycerol
—role in serological activity of *M. pneumoniae*, 408
Plaque assay
—for determining chlamydial infectivity, 259
Plaque formation
—by *Chlamydia* in L cells, 259
Plaquelike clearings
—induced on lawns of *P. aeruginosa*, 190
Plaques
—formed by streptococci and diptheroids, 604
Poly I:C
—protective effect on ocular lesions, 566
Polyarthritis of lambs
—electron microscopy of causative agent, 499
Polymorphonuclear leukocyte chemotactic activity
—generation in rabbit and guinea pig sera, 521
—major source in whole serum, 521
Polymorphonuclear leukocytic lysosomal proteins
—reversal of inhibition of antibacterial activity, 607
Polyphosphates
—inhibition of bacterial plaques, 604
Polysaccharide antigens
—isolated from *N. meningitidis*, 8
Precipitin inhibition
—of *C. stellatoidea* antiserum, 61
Protective antigen
—from *E. rhusiopathiae*, 380, 387
Proteinase
—production by *V. cholerae*, 80
Proteins
—from culture filtrates of *M. tuberculosis*, 164
Pseudomonas aeruginosa
—increased resistance to carbenicillin, 427
—plaquelike clearings induced on lawns of, 190

Purified antigens
—in studies of antitoxic immunity in cholera, 464, 468
Purine mononucleotides
—interconversion in *P. pestis*, 446
Pyelonephritis model
—for study of serum susceptibility and virulence of *S. faecalis*, 532
Pyran
—antibacterial effect of, 271

Quantal assay
—for determining specific activity of toxin, 423

R factor genes
—origin and selection for, 120
R factors
—mediating spectinomycin resistance, 120
R reactivity
—lost by endotoxin hybrids, 15
Rabbit serum
—enhancement of glutamic-pyruvic transaminase activity by, 215
—generation of polymorphonuclear leukocyte chemotactic activity, 521
Radioisotope incorporation
—for microbial susceptibility testing, 421
Rat foot edema model
—in studies of antitoxic immunity in cholera, 468
Rats
—*S. enteritidis* endotoxin in liver and spleen, 440
Resistance in mice
—induced by specific and nonspecific immunization, 274
Reticuloendothelial paralysis
—two types of, 327
Reticuloendothelial system
—function of, 327
Reversion from spheroplast to rod form
—increased carbenicillin resistance of *P. aeruginosa* after, 427
Ribonucleic acid preparations
—immunogenicity of, 574
Ribosome-associated ribonucleic acid
—mode of action in inducing immune response, 574
Rotary cultures
—effect of nitrogen sources on mycobacteria grown in, 513

Salmonella
—antibody response to single-factor O antigens, 41
—bacteriophage attachment to somatic antigen of, 88
—lipopolysaccharide composition, 88
—phage-adsorption ability, 88
—serological specificity, 88
Salmonella enteritidis endotoxin
—in liver and spleen of mice and rats, 440
Salmonella enteritidis mutants
—biological characteristics, 263
—protection of mice from *S. enteritidis* infection, 263
Salmonella O antigen
—fractions of, 219
Salmonella somatic antigens
—compared to *Candida* or *Shigella* antigens, 219
Salmonella typhimurium
—antibody response to somatic antigens of, 219
—immunogenicity of RNA preparations from, 574
—*M. bovis* BCG-infected mice resistant to, 583
—sensitivity to lysosomal fraction of polymorphonuclear leukocytes, 305
Salmonellae
—immunity to induced by RNA preparations, 574
Salmonellosis
—*M. bovis* BCG-infected mice resistant to, 583
—oral immunization against, 263
Secondary immune response
—effect of killed cells of *B. pertussis*, 251
Sensitized bentonite flocculation microtest
—for anticholeragen antibodies, 21
Serological relationships
—of *N. meningitidis*, 226
Serum
—effect on interaction of enterotoxin B and cell cultures, 455
—interaction with *A. fumigatus* spores, 345
Shigella flexneri
—genes controlling group and type-specific antigens, 279
—infection of mouse macrophages with, 459
Shigella flexneri antigens
—genetic transfer to *E. coli* K-12, 279
Shigellae
—lethality to mouse macrophages, 459
Sigmoidal kinetic hemolysis curves
—method of rectifying, 142
Single-factor *Salmonella* O antigens
—antibody response to, 41
Soil incubation
—effect on encapsulation of *C. neoformans*, 526
Solutes of urine
—effect on viability of spheroplasts in, 300
Specific immunization
—extent of resistance induced by, 274
Spectinomycin
—enzymatic adenylylation by *E. coli*, 109
Spectinomycin resistance
—resistance factor-mediated, 120
Spermine
—L-phase growth of *H. influenzae* reversed by, 474
—L-phase growth protected from antibiotics by, 474
Spheroplasts
—viability in urine, 300
Spleen of mice and rats
—*S. enteritidis* endotoxin in 440
Staphylococcal alpha toxin
—effect of Enovid on, 157
Staphylococcal enterotoxin B
—interaction with cell cultures, 455
Staphylococcus aureus
—effect of bactericidal substance from on streptococci, 485, 491
—effect of borate on coagulase-positive and -negative strains, 78
—L-forms prepared and isolated from, 169
Statolon
—antibacterial effect of, 271
Strain variation

XUM

—influence on immune response to *M. pneumoniae*, 559
Streptococcal cell wall fragments
—effects on phagocytosis and tissue culture cells, 232
Streptococci
—effect of bactericidal substance from *S. aureus*, 485, 491
—inhibition of plaques formed by, 604
Streptococcus faecalis
—effect of growth phase on serum susceptibility and virulence, 532
—effect of rabbit serum on glutamic-pyruvic transaminase activity, 215
Streptolysin O
—activation by thiols, 509
Streptomycin
—effect on intracellular mycobacterial proliferation, 30
—enzymatic adenylylation by *E. coli*, 109
Structural alterations
—in streptococci treated with bactericidal substance, 491
Synthetic polynucleotide complex
—protective effect on ocular lesions, 566
Syphilis
—procedure for early detection of, 555

Temperature
—effect on lytic activity of *Listeria* hemolysin, 356
Testing procedures
—effect on interaction of enterotoxin B and cell cultures, 455
Tetracycline
—activity against R-factor-carrying *Enterobacteriaceae*, 321
—induction of plaquelike clearings on lawns of *P. aeruginosa*, 190
Thiols
—activation of streptolysin O by, 509
Time-to-death assay
—effect of molecular size of botulinum toxin, 423
Tissue culture
—lymphocyte-mediated immunity to tuberculosis in, 600
Tissue culture cells
—effects of streptococcal cell wall fragments, 232
Trachoma agent
—effect of poly I:C on ocular lesions produced by, 566
Treponema pallidum
—natural human antibodies reactive with, 555
Tuberculoimmunity
—relationship to migration inhibition, 595
Tuberculosis
—lymphocyte-mediated immunity to, 600
Typhoid fever
—vaccination against in man, 243

Urine
—viability of spheroplasts in, 300

Vaccination technique
—influence on immune response to *M. pneumoniae*, 559
Vaccines
—protective effect in *M. pneumoniae* disease, 559
Vascular permeability factor
—production by *V. cholerae*, 80
Vasoactive agents
—role in lethality of *Listeria* hemolysin, 373
Vi antigen
—isolation from *E. coli*, 69
Vibrio cholerae
—bacteriocin typing of, 293
—biochemistry of virulence, 546
—production of bacteriophage-associated materials, 417
—production of biologically active substances, 80
Vibrio parahaemolyticus
—hemolytic activity compared with related vibrios, 394
—strains differentiated by hemolytic activity, 394

Wax D peptidoglycolipid
—inhibition of synthesis by D-cycloserine, 74

EX OFFICIO

E. M. FOSTER, President (1969–1970)
DONALD E. SHAY, Secretary

R. E. HUNGATE, Vice-President (1969–1970)
H. B. WOODRUFF, Treasurer

Infection and Immunity, a publication of the American Society for Microbiology, 4715 Cordell Ave., Bethesda, Md. 20014, is devoted to the advancement and dissemination of fundamental knowledge concerning 1) pathogenic microorganisms and infection, 2) ecology, epidemiology, and host factors, 3) antimicrobial agents and chemotherapy, and 4) immunology. *Infection and Immunity* is published monthly, and the twelve numbers are divided into two volumes per year. The subscription price is $15.00 per year to members of the American Society for Microbiology. The non-member subscription price is $36 (foreign, $37) per year. Single copies are $4.00 (foreign, $4.25). Correspondence relating to reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Publications Office, 4715 Cordell Ave., Bethesda, Md. 20014. Correspondence from ASM members relating to membership dues, member subscriptions, changes of address, incorrect address incorrect journals, etc., should be directed to the American Society for Microbiology, 1913 I St., N.W., Washington, D.C. 20006. Nonmembers of the Society should write to The Williams & Wilkins Co., 428 E. Preston St., Baltimore, Md. 21202, regarding institution of nonmember subscriptions and nonreceipt of journals. Published monthly by the ASM at 428 E. Preston St., Baltimore, Md. 21202.

Application to mail at second-class postage rates is pending at Baltimore, Md.
Made in the United States of America.

CONTENTS

No. 1, January 1970

Pathogenic Microorganisms and Infection

Previously Uncharacterized Mycoplasma Isolates from an Investigation of Canine Pneumonia. D. ARMSTRONG, J. G. TULLY, B. YU, V. MORTON, M. H. FRIEDMAN, AND L. STEGER 1
Hybridization by Deoxycholate Treatment or by Biological Degradation of Bacterial Endotoxins Extracted from Smooth and Rough Strains. L. CHEDID, M. PARANT, F. PARANT, F. PEROUX, AND J. J. PEREZ 15
Isolation and Properties of a Deuterium-Tolerant Mutant of *Pasteurella tularensis*. JERRY J. TULIS AND HENRY T. EIGELSBACH 56
Effect of Borate on the Growth of Coagulase-Positive and Coagulase-Negative Staphylococci. JAMES M. JAY 78
Production of Biologically Active Substances by Two Strains of *Vibrio cholerae*. HIDEO KUSAMA AND JOHN P. CRAIG 80
Early 2-Mercaptoethanol-Resistant Antibody Production in Endotoxin-Treated Rats. KATALIN MERÉTEY, ERZÉBET ELEKES, AND LÓRAND BERTÓK 135

Ecology, Epidemiology, and Host Factors

Effect of Hypertonic Sucrose Upon the Immune Bactericidal Reaction. LOUIS H. MUSCHEL AND LINDA J. LARSEN 51
A *Chlamydia* from the Peritoneal Cavity of Mice. ROBERT K. GERLOFF AND REX O. WATSON 64
Specific Inhibition of Endotoxin Coating of Red Cells by a Human Erythrocyte Membrane Component. GEORG F. SPRINGER, SHANKAR V. HUPRIKAR, AND ERWIN NETER 98

Antimicrobial Agents and Chemotherapy

Inhibition of the Synthesis of Wax D Peptidoglycolipid of *Mycobacterium tuberculosis* by D-Cycloserine. HUGO L. DAVID, DEXTER S. GOLDMAN, AND KUNI TAKAYAMA .. 74
Enzymatic Adenylylation of Streptomycin and Spectinomycin by R-Factor-Resistant *Escherichia coli*. R. BENVENISTE, T. YAMADA, AND J. DAVIES 109
Resistance Factor-Mediated Spectinomycin Resistance. DAVID H. SMITH, J. A. JANJIGIAN, NAOMI PRESCOTT, AND PORTER W. ANDERSON 120
In Vivo Susceptibility of *Cryptococcus neoformans* to Hamycin, Amphotericin B, and 5-Fluorocytosine. SMITH SHADOMY, H. JEAN SHADOMY, AND J. P. UTZ 128

Immunology

Isolation and Characterization of *Neisseria meningitidis* Groups A, C, X, and Y Polysaccharide Antigens. JOHN A. ROBINSON AND MICHAEL A. APICELLA 8
In Vitro Detection of Antibody to Cholera Enterotoxin in Cholera Patients and Laboratory Animals. RICHARD A. FINKELSTEIN AND JOHNNY W. PETERSON 21
Multiplication of *Mycobacterium tuberculosis* Within Normal and "Immune" Mouse Macrophages Cultivated With and Without Streptomycin. RONALD J. PATTERSON AND GUY P. YOUMANS 30
Antibody Response to Various Single-Factor O Antigens of *Salmonella*. KATHRYN KENNY, SIEGFRIED SCHLECHT, AND OTTO WESTPHAL 41
Precipitin Inhibition of *Candida stellatoidea* Antiserum with Oligosaccharides Obtained from the Parent Mannan. WILLIAM O. MITCHELL AND H. F. HASENCLEVER 61
Isolation of Vi Antigen from *Escherichia coli* by a New Method. VITO M. ESPOSITO AND JOHN C. FEELEY 69
Bacteriophage Attachment to the Somatic Antigen of *Salmonella*: Effect of O-Specific

Structures in Leaky R Mutants and S, T! Hybrids. ALF A. LINDBERG, MATTI SARVAS, AND P. HELENA MÄKELÄ 88
Immunoadsorbent for the Isolation of *Pasteurella tularensis*-Specific Antibodies. HOWARD H. WEETALL 137

No. 2, February 1970

Pathogenic Microorganisms and Infection

Use of a Logistic Function in Expressing Kinetic Hemolysis Data. ROBERT W. JACKSON, SCOTT F. BASINGER, AND JEAN M. WERTH 142
Purification and Characterization of Two Proteins for Culture Filtrates of *Mycobacterium tuberculosis* $H_{37}Ra$ Strain. THOMAS M. DANIEL AND LAVENIA E. FERGUSON 164
Synthesis of Enterotoxin by L-Forms of *Staphylococcus aureus*. JOYCE K. CZOP AND MERLIN S. BERGDOLL 169
Some Structural and Biological Properties of *Brucella* Endotoxin. D. LEONG, R. DIAZ, K. MILNER, J. RUDBACH, AND J. B. WILSON 174
Molecular Weight of Type A Botulinum Toxin. JOHN N. KNOX, WILLIAM P. BROWN, AND LEONARD SPERO 205
Identification of a Conococcal Antigen Important in the Human Immune Response. LINDA LEE AND JOHN D. SCHMALE 207

Ecology, Epidemiology, and Host Factors

Osmotically Sensitive *Brucella* in Infected Normal and Immune Macrophages. JERRY R. MCGHEE AND BOB A. FREEMAN 146
Mechanisms of Pathogenesis in *Listeria monocytogenes* Infection. IV. Hepatic Carbohydrate Metabolism and Function in Experimental Listeriosis. R. E. MCCALLUM AND C. P. SWORD 183
Intestinal Strangulation in *Escherichia coli*-Monocontaminated Gnotobiotic Rats. CHARLES E. YALE AND ALAPAKKAM R. VIVEK 195
Mutation of *Listeria monocytogenes* After Prolonged In Vivo Survival in Diffusion Chambers. JOHN W. OSEBOLD, P. M. OUTTERIDGE, AND L. D. PEARSON 209

Antimicrobial Agents and Chemotherapy

Enhanced Toxicity of Nervous System Drugs for Germ-Free Mice. CARL LAMANNA AND THOMAS G. WARD 139
Influence of Enovid on the Cytopathic Action of Staphylococcal Alpha Toxin. WILLIAM YOTIS AND ZLATKO SAVOV 157
Plaquelike Clearings Induced by Antimicrobial Agents on Lawns of *Pseudomonas aeruginosa*. MARIAN W. WOLFE AND DANIEL AMSTERDAM 190
Amantadine Therapy of Epidemic Influenza A_2 (Hong Kong). VERNON KNIGHT, DAVID FEDSON, JAMES BALDINI, R. GORDON DOUGLAS, AND ROBERT B. COUCH 200

Immunology

Detection of Antibody-Producing Cells of Mice Injected with Antigens of *Neisseria meningitidis*. DOLORES G. EVANS 151
Antigenic Nature of Bacterial Flagellar Hook Structures. K. DIMMITT AND M. SIMON 212

No. 3, March 1970

Pathogenic Microorganisms and Infection

Enhancement of Glutamic-Pyruvic Transaminase Activity in Leptospirae by Addition of Rabbit Serum. ICHIJI MIFUCHI, MASAHARU HOSOI, AND TADASHI YAMASHITA 215
Bacteriocin Typing of *Vibrio cholerae*. A. N. CHAKRABARTY, SATI ADHYA, JAYANTISRI BASU, AND SUJATA G. DASTIDAR 293

XUM

Neuraminidase of *Pasteurella multocida*. WOLFGANG SCHARMANN, RUDOLF DRZENIEK, AND HANS BLOBEL 319

Ecology, Epidemiology, and Host Factors

Antibody Response to Bacterial Antigens: Characteristics of Antibody Response to Somatic Antigens of *Salmonella typhimurium*. Y. FUKAZAWA, T. SHINODA, T. YOMODA, AND T. TSUCHIYA 219
Relationship of Serogroups of *Neisseria meningitidis*. I. Microagglutination, Gel Diffusion, and Slide Agglutination Studies of Meningococcal Antisera Before and After Absorption with RAS-10 Strain of Meningococci. LEONARD F. DEVINE AND CLINE R. HAGERMAN 226
Effects of Streptococcal Cell Wall Fragments on Phagocytosis and Tissue Culture Cells. JOE M. JONES AND JOHN H. SCHWAB 232
Plaque Formation by *Chlamydia* in L Cells. JOYCE BANKS, B. EDDIE, JULIUS SCHACHTER, AND K. F. MEYER 259
Protection of Mice Against Bacterial Infection by Interferon Inducers. FRANK F. PINDAK 271
Extent of Specific to Nonspecific Resistance in Mice: Parenteral Versus Aerosol Challenge. ROBERTA J. HACKETT AND STANLEY MARCUS 274
Interaction of Gram-Negative Bacteria with the Lysosomal Fraction of Polymorphonuclear Leukocytes. I. Role of Cell Wall Composition of *Salmonella typhimurium*. D. FRIEDBERG AND M. SHILO 305
Interaction of Gram-Negative Bacteria with the Lysosomal Fraction of Polymorphonuclear Leukocytes. II. Changes in the Cell Envelope of *Escherichia coli*. D. FRIEDBERG, I. FRIEDBERG, AND M. SHILO 311

Antimicrobial Agents and Chemotherapy

Conditions Affecting the Viability of Spheroplasts in Urine. HÅKAN GNARPE AND LARS EBEDO 300

Immunology

Immunity to Enteric Infection in Mice. FRANK M. COLLINS 243
Variable Adjuvant Activity of *Bordetella pertussis* with Respect to the Primary and and Secondary Immunization of Mice. H. FINGER, P. EMMERLING, AND E. BRÜSS 251
Oral Immunization Against Experimental Salmonellosis. I. Development of Temperature-Sensitive Mutant Vaccines. K. J. FAHEY AND G. N. COOPER 263
Genetic Transfer of *Shigella flexneri* Antigens to *Escherichia coli* K-12. S. B. FORMAL, P. GEMSKI, JR., L. S. BARON, AND E. H. LABREC 279
Immunosuppression by Murine Sarcoma Virus (Moloney). S. P. CHAN, W. A. HOOK, W. TURNER, AND M. A. CHIRIGOS 288

No. 4, April 1970

Pathogenic Microorganisms and Infection

Effects of *Listeria monocytogenes* Hemolysin on Phagocytic Cells and Lysosomes. G. CHARLES KINGDON AND C. P. SWORD 356
Biochemical and Immunological Effects of *Listeria monocytogenes* Hemolysin. G. CHARLES KINGDON AND C. P. SWORD 363
Cardiotoxic and Lethal Effects of *Listeria monocytogenes* Hemolysin. G. CHARLES KINGDON AND C. P. SWORD 373
Comparative Hemolytic Activity of *Vibrio parahaemolyticus* and Related Vibrios. ROBERT M. TWEDT, ROSEMARY E. NOVELLI, PROCTER L. SPAULDING, AND HERBERT E. HALL 394
Production of Bacteriophage-Associated Materials by *Vibrio cholerae:* Possible Correlation with Pathogenicity. CHARLOTTE PARKER, S. H. RICHARDSON, AND W. R. ROMIG 417
Dependence of Time to Death on Molecular Size of Botulinum Toxin. CARL LAMANNA, LEONARD SPERO, AND EDWARD J. SCHANTZ 423

Ecology, Epidemiology, and Host Factors

Function of the Reticuloendothelial System. IV. Evidence for Two Types of Particle-Induced Reticuloendothelial Paralysis. SIGURD J. NORMANN 327
Function of H_2O_2, Myeloperoxidase, and Hexose Monophosphate Shunt Enzymes in Phagocytizing Cells from Different Species. B. B. PAUL, R. R. STRAUSS, A. A. JACOBS, AND A. J. SBARRA 338
Interaction of *Aspergillus fumigatus* Spores with Human Leukocytes and Serum. ROBERT I. LEHRER AND RONALD G. JAN 345
Chronic Infections by Herpes Simplex Viruses and by the Horse and Cat Herpesviruses. G. PLUMMER, D. C. HOLLINGSWORTH, A. PHUANGSAB, AND C. P. BOWLING 351

Antimicrobial Agents and Chemotherapy

Activity of Minocycline Against R Factor-Carrying *Enterobacteriaceae*. H. JAROLMEN, D. HEWEL, AND E. KAIN 321
Rapid Method of Microbial Susceptibility Testing. J. KENNETH MCCLATCHY 421

Immunology

Preparation of Cholera Vaccines by Fluorocarbon Extraction of Cholera Vibrio Suspensions. PATRICIA L. ALTIERI, SANFORD BERMAN, ALBERT GROFFINGER, AND JOSEPH P. LOWENTHAL 334
Isolation and Characterization of a Protective Antigen-Containing Particle from Culture Supernatant Fluids of *Erysipelothrix rhusiopathiae*. R. R. WHITE AND W. F. VERWEY 380
Solubilization and Characterization of a Protective Antigen of *Erysipelothrix rhusiopathiae*. R. R. WHITE AND W. F. VERWEY 387
Antigens of Mycobacterial Cell Walls. K. H. WONG, M. J. PICKETT, AND S. FROMAN. 400
Role of Glycolipids and Phosphatidylglycerol in the Serological Activity of *Mycoplasma pneumoniae*. S. RAZIN, B. PRESCOTT, G. CALDES, W. D. JAMES, AND R. M. CHANOCK 408

No. 5, May 1970

Pathogenic Microorganisms and Infection

Characteristics of Endotoxin-Altering Fractions Derived from Normal Serum. III. Isolation and Properties of Horse Serum α_2-Macroglobulin. MORIMASA YOSHIOKA AND SEISHI KONNO 431
Subcellular Localization of *Salmonella enteritidis* Endotoxin in Liver and Spleen of Mice and Rats. JAMES T. WILLERSON, ROBERT L. TRELSTAD, THEODORE PINCUS, STUART B. LEVY, AND SHELDON M. WOLFF 440
Interconversion of Purine Mononucleotides in *Pasteurella pestis*. R. R. BRUBAKER 446
Interaction of Staphylococcal Enterotoxin B with Cell Cultures. I. Effect of Serum and Testing Procedures. WARREN I. SCHAEFFER 455
Infection of Cultured Mouse Macrophages with *Shigella flexneri*. ROBERT B. YEE AND CAROL L. BUFFENMYER 459
Effect of Bactericidal Substance from *Staphylococcus aureus* on Group A Streptococci. I. Biochemical Alterations. ADNAN S. DAJANI, ERNEST D. GRAY, AND LEWIS W. WANNAMAKER 485
Effect of Bactericidal Substance from *Staphylococcus aureus* on Group A Streptococci. II. Structural Alterations. C. CARLYLE CLAWSON AND ADNAN S. DAJANI 491
Electron Microscopy of Cell Cultures Infected with a Chlamydial Agent Causing Polyarthritis of Lambs. RANDALL C. CUTLIP 499
Recovery and Characterization of a Minute Virus of Canines. L. N. BINN, E. C. LAZAR, G. A. EDDY, AND M. KAJIMA 503
Streptolysin O: Activation by Thiols. ALAN W. BERNHEIMER AND LOIS S. AVIGAD 509

XUM

Antimicrobial Agents and Chemotherapy

Increased Resistance of *Pseudomonas aeruginosa* to Carbenicillin After Reversion from Spheroplast to Rod Form. CHATRCHAI WATANAKUNAKORN, JOHN P. PHAIR, AND MORTON HAMBURGER 427
Reversal of Penicillin-Induced L-Phase Growth of *Haemophilus influenzae* by Spermine and Its Effects on Antibiotic Susceptibility. E. M. LAPINSKI AND E. D. FLAKAS ... 474

Immunology

Antitoxic Immunity in Experimental Cholera: Observations with Purified Antigens and the Ligated Ileal Loop Model. RICHARD A. FINKELSTEIN 464
Antitoxic Immunity in Experimental Cholera: Observations with Purified Antigens and the Rat Foot Edema Model. RICHARD A. FINKELSTEIN AND RUSSELL C. HOLLINGSWORTH 468
New Classification of *Neisseria meningitidis* by Means of Bactericidal Reactions. RONALD GOLD AND FREDERIC A. WYLE 479
Cellular Immunity to *Listeria monocytogenes* Induced by Sensitization and Challenge with Bovine Gamma Globulin. R. Y. DODD 511

No. 6, June 1970

Pathogenic Microorganisms and Infection

Utilization of Amino Acids During Growth of *Mycobacterium tuberculosis* in Rotary Cultures. RICHARD H. LYON, WENDELL H. HALL, AND CARLOS COSTAS-MARTINEZ 513
Cryptococcus neoformans. IV. The Not-So-Encapsulated Yeast. FERESHTEH FARHI, G. S. BULMER, AND J. R. TACKER 526
Pyelonephritis. XI. Effect of Growth Phase of *Streptococcus faecalis* on Serum Susceptibility and Virulence. LUCIEN B. GUZE, EARL G. HUBERT, AND GEORGE M. KALMANSON 532
Effect of Animal Passage on Arthritogenic and Biological Properties of *Mycoplasma arthritidis*. L. GOLIGHTLY-ROWLAND, B. C. COLE, J. R. WARD, AND B. B. WILEY 538
Biochemistry of *Vibrio cholerae* Virulence. I. Purification and Biochemical Properties of PF/Cholera Enterotoxin. STEPHEN H. RICHARDSON, DOLORES G. EVANS, AND JOHN C. FEELEY 546
Macrophage Migration Inhibition Studies with Cells from Mice Vaccinated with Cell Walls of *Mycobacterium bovis* BCG: Characterization of the Experimental System. K. YAMAMOTO AND R. L. ANACKER 587
Macrophage Migration Inhibition Studies with Cells from Mice Vaccinated with Cell Walls of *Mycobacterium bovis* BCG: Relationship Between Inhibitory Activity of Lung Cells and Resistance to Airborne Challenge with *Mycobacterium tuberculosis* H37Rv. K. YAMAMOTO, R. L. ANACKER, AND E. RIBI 595

Ecology, Epidemiology, and Host Factors

Reversibility of Heparin Inhibition of the Antibacterial Activity of Polymorphonuclear Leukocyte Lysosomal Proteins. J. M. CLARK AND R. D. HIGGINBOTHAM 607

Antimicrobial Agents and Chemotherapy

Protective Effect of a Synthetic Polynucleotide Complex (Poly I:C) on Ocular Lesions Produced by Trachoma Agent in Rabbits. J. O. OH, H. B. OSTLER, AND J. SCHACHTER 566
Polyphosphate Inhibition of Growth of Plaques Formed by Streptococci and Diphtheroids Implicated in Oral Disease. J. M. TANZER AND G. J. HAGEAGE, JR 604

Immunology

Polymorphonuclear Leukocyte Chemotactic Activity in Rabbit Serum and Guinea Pig Serum Treated with Immune Complexes: Evidence for C5a as the Major Chemotactic Factor. RALPH SNYDERMAN, JEAN PHILLIPS, AND STEPHAN E. MERGENHAGEN 521
Immunoglobulin Class of Natural Human Antibodies Reactive with *Treponema pallidum*. A. J. JULIAN, L. C. LOGAN, L. C. NORINS, AND I. R. COHEN 555
Protective Effect of Vaccines in Experimental *Mycoplasma penumoniae* Disease. GERALD W. FERNALD AND WALLACE A. CLYDE, JR 559
Immunogenicity of Ribonucleic Acid Preparations Obtained from *Salmonella typhimurium*. MARTIN R. VENNEMAN, NANCY J. BIGLEY, AND L. JOE BERRY 574
Salmonellosis in Mice Infected with *Mycobacterium bovis* BCG. II. Resistance to Infection. VERNON C. SENTERFITT AND JOSEPH W. SHANDS, JR 583
Demonstration in Tissue Culture of Lymphocyte-Mediated Immunity to Tuberculosis. RONALD J. PATTERSON AND GUY P. YOUMANS 600

SUBJECT INDEX

Adenosine diphosphate
—effect on aggregation of mouse platelets, 260
Adenovirus-associated satellite viruses
—seroepidemiological and ecological studies, 716
Adjuvancy
—of *B. pertussis*, 590
Adrenergic receptor function
—studied by use of the mouse platelet, 260
Adsorbent
—effect on elaboration of protective antigen by *B. anthracis*, 772
Agar-gel precipitating antibody
—in *P. aeruginosa* infections, 495
Agrobacterium
—tumor initiation by, 623
Agrobacterium tumefaciens
—infectivity enhanced by chlorpromazine hydrochloride, 468
Aldehydes
—generation by myeloperoxidase-H_2O_2-chloride system, 414
Alkali
—effect on *S. typhimurium* lipopolysaccharide, 549
Allergic pulmonary granuloma formation
—effect of antimacrophage serum on, 810
Alloxan-diabetic rabbits
—cerebral zygomycosis in, 404
—temperature tolerance of zygomycetes in, 404
Amino acid analysis
—of crystalline toxin of *C. botulinum*, 679
Amino acid auxotrophs
—of *M. avium*, 223
Amino acid components
—of cell walls of *B. abortus*, 237
Amino acids
—effect on uptake of cystine by *H. capsulatum*, 139
Anaerobic bacteria
—implantation in germ-free mice, 376
Anthrax
—studies on immunity in, 772
Anthrax bacilli
—phagocytosis of, 216
Anti-IgG test
—for psittacosis, 7
Anti-Kupffer cell serum
—effect on phagocytosis and humoral antibody formation, 448
Antibiotic uptake
—by macrophages, 89
Antibody-forming spleen cells
—effect of *Brucella* endotoxins on, 1
Antibody responses
—in cattle infected with contagious bovine pleuropneumonia, 617
Antibody type specificity
—to trachoma in eye secretions, 65
Antibrain antibodies
—method for production, 676
Antigen-associated immunosuppressant
—chlorphenesin, 60
Antigenic properties
—of an arbovirus altered by host passage, 735
Antigenic relationship
—of six strains of *P. brasiliensis*, 268
Antigenic stimulation
—response of Peyer's patches to, 96
Antigenic stimulus
—time relationship to injection of adjuvant, 590
Antimacrophage serum
—effect on delayed sensitivity reactions, 810
Antithymocytic serum
—effect on growth of mouse lymphomas, 11
—incidence of lymphoma in mice injected with, 723
Antiviral antibody
—immobilization at the cell surface, 791
Antrycide
—failure in treatment of leptospirosis, 681
9-β-D-Arabinofuranosyladenine
—sensitivity of types 1 and 2 herpes simplex virus to, 815
Arbovirus serotype
—alterations in antigenic properties of, 735
Aster yellows disease
—possible mycoplasma etiology, 201, 209
—suppression in insect vectors, 209
Avian adenovirus (CELO) mutant
—nonpathogenic for chicken embryo, 118

Bacillus anthracis
—elaboration of protective antigen by, 772
—phagocytosis of capsulated cells, 216
Bacteremia
—detection by gas chromatography, 474
Bacteria-free diffusion chambers
—cellular responses of mice to, 127
Bacterial antigens
—effect of chlorphenesin on immune response to, 60
Bacteriophage 84/85
—staphylococci lysed by, 669
Bacteriophage-nontypable staphylococci
—typing on caseinate-agar, 439
Bacteroides fragilis
—interactions with *S. flexneri*, 364
BCG vaccine
—tuberculosis resistance induced in monkeys by, 574
Bdellovibrio bacteriovorus parasitism
—in *Shigella* species, 340
Bentonite-gamma globulin complexes
—virus infection prevented by, 791
BHK-21 cells
—for production of rubella antibodies, 360
Biological mimicry
—in mycoplasma-infected rodents, 419
Biologically active components
—from phenol extracts of *B. suis*, 244
Bordetella pertussis
—adjuvancy of, 590
—effect on adenosine diphosphate-induced aggregation of mouse platelets, 260
Borrelia hermsii
—susceptibility of rodents to, 256

Bovine mycoplasmas
—characterization of, 101
—genital tract pathogenicity of, 101
Brucella abortus
—cell walls of strains of low and high virulence, 237
—resistance to virus infection in mice infected with, 698
Brucella antigens
—separation by gel-filtration chromatography, 48
Brucella endotoxins
—effect on initiation of antibody-forming spleen cells, 1
Brucella suis
—fractionation of phenol extracts from, 244
—soluble precipitating antigens of, 48
Bunyamwera virus
—infection of monkeys with, 762

Calves
—chlamydial infections in, 351
Candida albicans
—susceptibility to 5-fluorocytosine, 484
Candidacidal activity
—of specific leukocyte types, 42
Candidiasis (systemic)
—treatment with 5-fluorocytosine, 484
Carbohydrate components
—of cell walls of *B. abortus*, 237
Carrier cultures
—rubella virus production in, 132
Caseinate-agar
—typing of staphylococci on, 439
Catecholamines
—effect on platelet aggregation, 260
Cattle
—infected with contagious bovine pleuropneumonia, 617
Cell culture system
—effect on sensitivity of herpes simplex virus to antiviral agents, 815
Cell-mediated hypersensitivity
—in gonorrhea, 655
Cell-mediated resistance
—to *S. aureus*, 757
Cell surface
—immobilization of antiviral antibody at, 791
Cell surface antigen
—induced by Venezuelan equine encephalomyelitis virus, 713
Cell wall antigens
—of *S. aureus*, 54
Cell wall component
—affecting phagocytosis of *S. aureus*, 750
Cell wall-defective staphylococci
—scanning-beam microscopy of, 504
Cell wall structure
—role in interaction of *Salmonella* with phagocytes, 279
Cell walls
—of *B. abortus* strains of low and high virulence, 237
Cellular immunity
—in preleukemic mice, 398
—to vaccinia virus, 783
Cellular responses
—of mice to diffusion chambers, 127
Cephalothin
—resistance of *Enterobacter* to, 610
Charcoal
—effect on elaboration of protective antigen by *B. anthracis*, 772
Chicken embryo
—avian adenovirus mutant nonpathogenic for, 118
Chicken embryo tracheal cultures
—growth of *M. mycoides* var. *capri* in, 431
Chickens
—hemagglutin response to *P. lophurae* malaria, 304
China aster
—effect of antibiotics on aster yellows disease, 201
Chipmunks
—susceptibility to *B. hermsii*, 256
Chlamydia
—plaque reduction test in serotyping, 443
Chlamydia psittaci 6BC
—hemagglutinating active fraction from, 316
Chlamydia trachomatis
—DNA heterogeneity between human and murine strains, 24
Chlamydial infections
—in calves intestines, 351
Chloramphenicol
—effect on aster yellows disease, 201
—effect on aster yellows in insect vectors, 209
Chlorphenesin
—effect on immune response of rabbits, 60
Chlorpromazine hydrochloride
—infectivity of *A. tumefaciens* enhanced by, 468
Cholera
—action of intestinal antibody in, 556
Cholera exo-enterotoxin
—monospecific equine antiserum against, 691
Cholera toxin
—effect of Formalin on electrophoretic mobility, 120
Chronic granulamatous disease neutrophils
—candidacidal activity of, 42
Chrysanthemums
—effect of antibiotics on aster yellows disease, 201
Clofazimine
—for potentiation of macrophage function, 601
Clostridium botulinum type A
—crystalline toxin of, 679
Clostridium perfringens
—effect on rabbit serum lactate dehydrogenase, 123
Coagulase-positive staphylococci
—typing on buffered caseinate-agar, 439
Cold-exposed mice
—invasiveness of *Salmonella* given orally to, 274
Colicin
—effect on *Shigella* keratoconjunctivitis, 15
Colicinogenic bacteria
—effect on a pathogenic bacterium, 15
Colonial forms
—of *M. avium* on 7H10 agar, 223
Common antigen
—between *Brucella* and sheep red blood cells, 1
—produced by enteric bacteria, 767
Compact variants
—of *S. aureus* strains, 523

XUM

Complement
—role in canine endotoxin shock, 38
Complement-dependent cytotoxicity
—exhibited by antimacrophage serum, 810
Complement depletion
—effect on hypotensive phase in dogs, 38
Complement-fixing antibody assays
—in studies of adenovirus-associated satellite viruses, 716
Contagious bovine pleuropneumonia
—antibody in cattle infected with, 617
Coumermycin A_1
—effect of EDTA and Mg^{2+} on, 371
Crown-gall tumor
—initiation by *Agrobacterium*, 623
Cryptococcus neoformans
—susceptibility to 5-fluorocytosine, 484
Crystalline toxin
—of *C. botulinum* type A, 679
Cycloheximide
—cytopathology in HeLa cells induced by, 705
Cystine
—role in dimorphic behavior of *H. capsulatum*, 169
—uptake by yeast cells of *H. capsulatum*, 139, 169

Delayed sensitivity reactions
—effect of antimacrophage serum on, 810
Deoxyribonucleic acid heterogeneity
—between human and murine strains of *C. trachomatis*, 24
Dermal tuberculin sensitivity
—effect of antimacrophage serum on, 810
Diazotized arsanilic and sulfanilic acid groups
—immunogenicity of encephalitogenic protein enhanced by, 676
Diffuse variants
—of *S. aureus* strains, 523
Diffusion chambers
—cellular responses of mice to, 127
Dihydrostreptomycin
—uptake by macrophages in culture, 89
Diphtheria toxin
—action on heart and muscle tissues, 686
Diptheroids
—in vitro plaque formation by, 683
Donetta strain mycoplasma
—cytopathic effects and ultrastructure, 105
Drug potentiation
—of macrophage function, 601

Echovirus antibody
—in serum, nasopharynx, rectum, and spinal fluid, 150
Ecological studies
—of adenovirus-associated satellite viruses, 716
Effector mechanism
—producing local resistance to staphylococcal challenge, 757
Elastase activity
—of protease from *P. aeruginosa*, 583
Electron microscopy
—of phagocytosis of *B. anthracis*, 216
Electrophoretic mobility
—of cholera toxin, 120

Encapsulated strains
—of *S. aureus*, 523, 528
Encephalitogenic protein
—enhanced immunogenicity of, 676
Endotoxin
—effect of Freund's adjuvant on interferon response to, 69
—in generation of histamine-releasing factor, 462
—isolated from *P. pestis*, 229
Endotoxin shock
—role of complement in, 38
Enteric bacteria
—common antigen produced by, 767
Enteric flora
—intestinal flora assuming the functions of, 376
Enteric infection
—effect of temperature on response to, 274
Enterobacter
—role of β-lactamase in resistance to cephalothin, 610
Enterobacteriaceae
—common antigen produced by representative strains of, 767
Enterobacterial common antigen
—pyelonephritis prevented by antibodies against, 175
Escherichia coli
—mouse virulence of, 674
—phagocytosis in mouse peritoneum, 570
Escherichia coli populations
—mechanisms for control in mice, 376
Estrogen
—effect on MM virus-infected mice, 426
Ethambutol
—inhibition of *M. tuberculosis* by, 479
Ethylenediaminetetraacetate
—effect on activity of novobiocin and coumermycin A_1, 371
Eye secretions
—antibody type specificity to trachoma in, 65
—transferrin, immunoglobulins, and secretory component in, 489

Fisher-Devlin-Gnabasik immunotypes
—for detection of antibodies to *P. aeruginosa*, 495
Flies
—transmission of *Salmonella* by, 800
Fluorescent-antibody marker
—for rubella antibodies, 360
Fluorescent-antibody reaction
—between *S. aureus* and γG-globulin, 387
5-Fluorocytosine
—in vitro studies with, 484
Formalin treatment
—effect on electrophoretic mobility of cholera toxin, 120
Freund's adjuvant
—potentiating effect on interferon production, 69

γG-globulin
—fluorescent-antibody reaction with *S. aureus*, 387
G-phase variants
—of *S. aureus*, 644
Gas chromatography
—bacteremia in mice detected by, 474

Gel-filtration chromatography
—separation of *Brucella* antigens by, 48
Genital tract pathogenicity
—of bovine mycoplasmas, 101
Germ-free mice
—immunological responses of Peyer's patches in, 96
—implantation of anaerobic bacteria into, 376
Germiston virus
—infection of monkeys with, 762
Getah virus
—antigenic properties of, 735
Glycopeptide
—of staphylococcal cell walls, 54
Gonococcal antigens
—nature and heterogeneity, 162
—possible test for, 162
Gonococcal urethritis
—lymphocyte transformation in, 655
Gonorrhea
—cell-mediated hypersensitivity in, 655
Gotschlich procedure
—for production of meningococcal polysaccharides, 640
Gram-negative bacteria
—activity of coumermycin A_1 and novobiocin against, 371
Green bottle fly
—gut resistant to colonization by *S. typhimurium*, 800
Gross virus
—incidence of lymphoma in mice injected with, 723
Gross virus-induced lymphomas
—effect of antithymocytic sera on, 11
Group C antigens
—of *N. meningitidis*, 392
Group Y antigens
—of *N. meningitidis*, 392
Groups A and C meningococcal polysaccharides
—pilot-scale production of, 640
Guinea pig eye
—for study of *Shigella* infections, 15
Guinea pig leukocyte cultures
—interferon induced by psittacosis agent in, 731
Guinea pig macrophages
—phagocytosis of *S. typhimurium* by, 145
Guinea pig polymorphonuclear leukocytes
—interaction with *Salmonella*, 279

Hamster serum
—in generation of histamine-releasing factor, 462
Heart tissues
—action of diphtheria toxin on, 686
HeLa cells
—cytopathology in induced by reovirus and cycloheximide, 705
Hemagglutinating active fraction
—from *C. psittaci* 6BC, 316
Hemagglutinin
—produced during *P. lophurae* malaria, 304
Hematogenous pyelonephritis
—prevention by antibodies against common antigen, 175
Hemorrhagic shock
—bactericidal activity of leukocytes in, 345

Herpes simplex virus
—sensitization by immunoglobulin G, 778
Herpes simplex virus types 1 and 2
—sensitivity to 5-iodo-2'-deoxyuridine and 9-β-D-arabinofuranosyladenine, 815
Histamine-releasing factor
—generated by interaction of endotoxin with hamster serum, 462
Histoplasma capsulatum
—uptake of cystine by the yeast phase, 139, 169
Host cell penetration
—of *T. gondii*, 250
Host-parasite interactions
—role of the phagocyte in, 414
Host passage
—antigenic properties of an arbovirus altered by, 735
House fly
—gut resistant to colonization by *S. typhimurium*, 800
Human macrophages
—bactericidal activity, 156
—interaction with intracellular parasite, 156
Human sources
—encapsulated *S. aureus* strains from, 528
Humoral antibacterial factors
—to *S. aureus*, 742
Humoral antibody formation
—effect of anti-Kupffer cell serum, 448
Humoral immunity
—in preleukemic mice, 398

Immune response
—in contagious bovine pleuropneumonia-infected cattle, 617
—to *P. aeruginosa* infections, 495
—to temperature-sensitive mutants of *S. enteritidis*, 183
Immune sera
—failure to enhance phagocytosis of *S. aureus*, 742
Immunity
—in vibriocinogenic bacteria, 519
Immunofluorescence procedures
—for demonstrating specific antibody in transmissible mink encephalopathy, 727
Immunofluorescence staining
—specific surface antigen detected by, 713
Immunofluorescence studies
—of chlamydial infections, 351
Immunogenic activity
—of mycobacterial ribosomal and RNA preparations, 659
Immunogens
—group A and C meningococcal polysaccharide, 640
Immunoglobulin A
—herpes simplex virus neutralized by, 778
Immunoglobulin G
—ability of *S. aureus* cells to adsorb, 342
—herpes simplex virus sensitized by, 778
Immunoglobulin G antibodies
—activities to *P. aeruginosa*, 453
Immunoglobulin M antibodies
—activities to *P. aeruginosa*, 453

Immunoglobulins
—in eye secretions of infants, 489
—in preleukemic mice, 398
Immunological properties
—of *S. aureus* strains, 528
Immunological reactivity
—of alkali-treated lipopolysaccharide, 549
Immunologically induced resistance
—to *S. aureus*, 757
Induction
—in vibriocinogenic bacteria, 519
Infant mice
—infected with non-neuroadapted Western equine encephalitis virus, 533
Interferon
—effect on rubella virus production in carrier cultures, 132
Interferon induction
—in mice infected with *B. abortus*, 698
—in psittacosis-infected guinea pig leukocyte cultures, 731
Interferon production
—potentiating effect of Freund's adjuvant, 69
International reference
—for immunological studies in cholera, 691
Intestinal antibody
—action in experimental cholera, 556
Intestinal bacteria
—effect of association with germ-free mice, 376
Intestinal chlamydial infections
—in calves, 351
Intestinal flora
—*S. flexneri* inhibited by, 364
Intestinal fluid
—antibody responses in, 29
Intestinal surface
—adsorption of vibrios prevented, 556
Intestinal tissues of rats
—behavior of mutant strains of *S. enteritidis* in, 192
Intracellular parasite
—interaction with human macrophages, 156
—killing by macrophages, 601
Intrahepatic injections
—of *C. perfringens*, effect on serum lactate dehydrogenase, 123
Intramuscular injections
—of *C. perfringens*, effect on serum lactate dehydrogenase, 123
Intranuclear growth
—of *R. canada*, 112
5-Iodo-2′-deoxyuridine
—sensitivity of types 1 and 2 herpes simplex virus to, 815

Kidney cells
—multiplication of *P. pseudotuberculosis* in, 631
Kilham rat virus infection
—pathogenesis and transmission in rats, 298
Kupffer cells
—role in host defense physiology, 448

L phase
—reversal by inactivation of penicillin with polyamines, 292
L-phase variants
—of *S. aureus*, 644
β-Lactamase
—role in resistance of *Enterobacter* to cephalothin, 610
Leptospires
—lipids of parasitic and saprophytic complexes, 286
Leptospirosis
—failure of antrycide in treatment of, 681
Leukocytes
—bactericidal activity in hemorrhagic shock, 345
—candidacidal activity of, 42
Lincomycin
—in vitro susceptibility of staphylococci to, 669
Lipid composition
—of cell walls of *B. abortus*, 237
—of hemagglutinating active fraction of chlamydiae, 316
Lipid-defined medium
—effect on lipid composition of *T. pallidum* Kazan 5, 606
Lipids
—of parasitic and saprophytic leptospires, 286
—of *T. pallidum* Kazan 5, 606
Lipopolysaccharide
—effect of alkali on, 549
—from *S. typhimurium*, 549
—hemodynamic responses of dog to, 38
—role in phagocytosis of *Shigella*, 570
Listeria
—killing by macrophages enhanced, 601
Listeria monocytogenes
—killed by human macrophages, 156
—responses of mice to diffusion chambers containing, 127
LLC-MK2 cells
—for production of rubella antibodies, 360
Lung cell-carrier cultures
—effect of interferon on virus production in, 132
Lymphocyte transformation
—in repeated gonococcal urethritis, 655
Lymphocytes
—role in immunity to vaccinia virus, 783
Lymphoma
—in mice injected with Gross virus and antithymocytic serum, 723
Lymphoma cells
—neutralized by antithymocytic sera, 11
Lysis
—of streptococci by lysozyme, 563
Lysozyme
—lysis of streptococci by, 563

Macrophage function
—drug potentiation of, 601
Macrophages
—interaction with salmonellae, 145
—mechanism for killing parasites, 601
—role in immunity to vaccinia virus, 783
—uptake of ^{3}H-dihydrostreptomycin by, 89
Mammalian cell cultures
—combined effect of cycloheximide and reovirus on, 705

XUM

Mammalian cells
—permeability to ^{3}H-dihydrostreptomycin, 89
Mast cells
—release of histamine from, 462
Maternal antibodies
—role in Kilham rat virus infection, 298
Meadow voles
—susceptibility to *B. hermsii*, 256
Membranes
—of *M. pneumoniae*, 326
Meningococcal polysaccharide immunogens
—pilot-scale production of, 640
Metabolic inhibiting antibodies
—in mycoplasma-infected rodents, 419
Mg^{2+}
—effect on activity of novobiocin and coumermycin A_1, 371
Mice
—cellular responses to diffusion chambers, 127
—detection of bacteremia in, 474
—tissue responses to purified protease, 583
—transplacental transmission of St. Louis encephalitis virus, 320
—virulence of *E. coli* for, 674
Minocycline
—in vitro susceptibility of staphylococci to, 669
MM virus infection
—effect of steroids on, 426
Monkeys
—aerosol induction of tuberculosis in, 574
—infected with Bunyamwera and Germiston viruses, 762
Monospecific equine antiserum
—against cholera exo-enterotoxin, 691
Mouse lymphomas
—effect of antithymocytic sera on growth, 11
Mouse peritoneal macrophages
—interaction with *Salmonella*, 279
Mouse peritoneum
—phagocytosis of *Shigella* and *E. coli* in, 570
Mucopeptide
—effect on phagocytosis of *S. aureus*, 750
Mucosal surface
—antibody-mediated reaction at, 556
Murine mycoplasmas
—immunological response of rodents to, 419
Muscle tissues
—action of diphtheria toxin on, 686
Mutation
—spontaneous and induced in *M. avium*, 223
Mycelial phase
—of *P. brasiliensis* compared with yeast phase, 268
—polysaccharides of, 347
Mycobacteria
—ribosomal and RNA preparations from, 659
Mycobacterial ribonucleic acid preparations
—chemical and physical characteristics, 659
Mycobacterial ribosomal preparations
—chemical and physical characteristics, 659
Mycobacterium avium
—spontaneous and induced mutation, 223
Mycobacterium bovis Ushi 10
—polysaccharides of, 347
Mycobacterium P1
—polysaccharides of, 347
Mycobacterium phlei
—polysaccharides of, 347
Mycobacterium smegmatis
—polysaccharides of, 347
Mycobacterium tuberculosis
—growth inhibition of, 479
Mycoplasma agalactiae var. *bovis*
—cytopathic effects and ultrastructure, 107
Mycoplasma etiology
—of aster yellows disease, 201, 209
Mycoplasma mycoides var. *capri*
—pathogenesis in chicken embryo cultures, 431
Mycoplasma pneumoniae membranes
—isolation and characterization, 326
Mycoplasmas
—immunological response of rodents to, 419
—in the bovine genital tract, 101
Myeloperoxidase-deficient neutrophils
—candidacidal activity of, 42
Myeloperoxidase-H_2O_2-chloride system
—aldehyde generation by, 414

Nasopharynx
—distribution of echovirus antibody in, 150
Neisseria gonorrhoeae antigens
—involved in the serum bactericidal reaction, 162
Neisseria meningitidis
—group A and C polysaccharide immunogens from, 640
—group C and Y antigens of, 392
Neuraminidase
—toxicity of, 115
Neutralizing antibodies
—demonstrated for *Chlamydia*, 443
Neutralizing antibody assays
—in studies of adenovirus-associated satellite viruses, 716
Neutrophils
—candidacidal activity of, 42
Nontumorigenic strains
—of *Agrobacterium*, 623
Normal rabbit serum
—effect on lymphoma in mice injected with Gross virus, 723
Novobiocin
—effect of EDTA and Mg^{2+} on, 371

Ocular tissue
—neutralization of herpes simplex virus in, 800
Oral immunization
—in experimental salmonellosis, 183, 192
Oral diphtheroids
—in vitro plaque formation by, 683
Oxidative phosphorylation
—inhibition by tirandamycin, 82

Paracoccidoides brasiliensis
—serological comparison of two phases of, 268
Parasites
—killing by macrophages, 601

Parasitic leptospires
—lipids of, 286
Parasitism
—of *Shigella* species by *B. bacteriovorus*, 340
Parotid secretion
—antibody responses in, 29
Passage history
—effect on sensitivity of herpes simplex virus to antiviral agents, 815
Pasteurella pestis
—endotoxin isolated from, 229
Pasteurella pseudotuberculosis
—multiplication in spleen and kidney cells, 631
Penetration-enhancing factor
—synthesized by *T. gondii*, 250
Penicillin
—L phase reversed by inactivation with polyamines, 292
Penicillinase
—production by variant strains of *S. aureus*, 644
Peptidoglycan component
—of staphylococcal cell walls, 54
Periodontal disease
—oral diphtheroids implicated in, 683
Permeability barriers
—role in resistance of *Enterobacter* to cephalothin, 610
Permeability factor
—isolated from *B. suis* endotoxin, 244
Peroxide
—production in *M. mycoides* var. *capri*-infected tracheal rings, 431
Peyer's patches
—responses to antigenic stimulation, 96
Phagocytes
—interaction with *Salmonella*, 279
—role in host-parasite interactions, 414
Phagocytosis
—effect of anti-Kupffer cell serum, 448
—of capsulated *B. anthracis*, 216
Phagocytosis-promoting factors
—nonspecific adsorption of, 742
Phenol extracts
—from *B. suis*, 244
Phosphate
—effect on elaboration of protective antigen by *B. anthracis*, 772
Pine squirrels
—susceptibility to *B. hermsii*, 256
Pinto bean leaf tumors
—enhancement by chlorpromazine, 468
Plague
—role of endotoxin in death from, 229
Plaque formation
—by oral diphtheroids, 683
Plaque reduction test
—for serotyping chlamydiae, 443
Plasmodium lophurae malaria
—hemagglutinin produced in chickens during, 304
Pneumococcal neuraminidase
—toxicity of, 115
Poly rI·poly rC
—effect of Freund's adjuvant on interferon response to, 69
Polyamines
—reversal of L phase by inactivation of penicillin with, 292
Polymorphonuclear leukocytes
—bactericidal activity in hemorrhagic shock, 345
Polynucleotide sequence
—of human and murine strains of *C. trachomatis*, 24
Polysaccharide antigens
—of *N. meningitidis*, 392
Polysaccharides
—of four strains of mycobacteria, 347
Preleukemic mice
—immune response in, 398
Protease (elastase)
—from *P. aeruginosa*, 583
Protective antigen
—elaborated by *B. anthracis*, 772
Protein A
—effect on phagocytosis of *S. aureus*, 750
—produced by staphylococci, 672
—role in immunofluorescence of *S. aureus*, 387
Pseudomonas aeruginosa
—activities of immunoglobulin antibodies to, 453
—protective slime antigen of, 543
—purified protease (elastase) from, 583
Pseudomonas aeruginosa infections
—agar-gel precipitating antibody in, 495
Pseudomonas aeruginosa slime
—chemical composition of, 543
Psittacosis
—serum neutralization test for, 7
Psittacosis agent
—interferon induced by, 731
Pulsed-drug exposures
—inhibition of *M. tuberculosis* after, 479
Pyelonephritis
—prevention by antibodies against common antigen, 175

Quinapyramine
—failure in treatment of leptospirosis, 681

R factors
—accepted by *S. typhimurium*, 516
Rabbit immunoglobulin antibodies
—to *P. aeruginosa*, 453
Rabbits
—zygomycosis in alloxan-diabetic animals, 404
Ranch mink
—transmissible mink encephalopathy in, 727
Rat liver mitochondria
—oxidative phosphorylation inhibited by tirandamycin, 82
Rats
—Kilham rat virus infection in, 298
Rectum
—distribution of echovirus antibody in, 150
Reovirus
—cytopathology in HeLa cells induced by, 705
Reticuloendothelial system
—role in host defende physiology, 448

XUM

Retrograde pyelonephritis
—prevention by antibodies against common antigen, 175
Reverted strains
—of *S. aureus*, 644
Rhesus monkeys
—host for testing mycobacterial vaccine, 574
Ribonucleic acid polymerase
—inhibition by tirandamycin, 77
Ribonucleic acid preparations
—from mycobacteria, 659
Ribosomal preparations
—from mycobacteria, 659
Rickettsia canada
—intranuclear growth of, 112
Rifampin
—inhibition of *M. tuberculosis* by, 479
Rodents
—immunological response to murine mycoplasmas, 419
—susceptibility to *B. hermsii*, 256
Rooster serm
—use in serotyping chlamydiae, 443
Rough mutants
—of *S. typhimurium* used as vaccines, 309
Rubella antibodies
—fluorescent-antibody marker for, 360
Rubella virus
—effect of interferon on production in carrier cultures, 132

St. Louis encephalitis virus
—transplacental transmission in mice, 320
Saliva
—antibody responses in, 29
Salmonella
—interaction with phagocytes, 279
—invasiveness when given to cold-exposed mice, 274
—transmission by flies, 800
Salmonella enteritidis
—behavior in intestinal tissues, 192
—immune response to temperature-sensitive mutants of, 183
Salmonella immunity
—induction by living vaccines, 192
Salmonella typhimurium
—phagocytosis by guinea pig macrophages, 145
—R-factor-bearing colonies, 516
—reactivity of lipopolysaccharide from, 549
—rough strains used as live vaccines, 309
Salmonellae
—interactions with guinea pig macrophages, 145
Salmonellosis
—immunity in, 309
—oral immunization in, 183, 192
Saprophytic leptospires
—lipids of, 286
Saudi Arab children
—antibody type specificity to trachoma in, 65
Scanning-beam electron microscopy
—of cell wall-defective staphylococci, 504
Secretory component
—in eye secretions of infants, 489
Seroepidemiological studies
—of adenovirus-associated satellite viruses, 716
Serological comparison
—of two morphological phases of *P. brasiliensis*, 268
Serological relationship
—between Bunyamwera and Germiston viruses, 762
Serum
—antibody responses in, 29
—distribution of echovirus antibody in, 150
Serum antibody determinations
—by means of anti-IgG test, 7
Serum bactericidal reaction
—*N. gonorrhoeae* antigens involved in, 162
Serum lactate dehydrogenase
—effect of injections of *C. perfringens*, 123
Serum neutralization
—for demonstrating specific antibody in transmissible mink encephalopathy, 727
Serum neutralization anti-IgG test
—for psittacosis, 7
Sheep red blood cells
—antibody-forming spleen cells in mice immunized with, 1
Shigella
—pathogenicity correlated with survival in mice, 570
—phagocytosis in mouse peritoneum, 570
Shigella flexneri
—inhibition by intestinal flora, 364
—interactions with *B. fragilis*, 364
Shigella keratoconjunctivitis
—effect of colicin, 15
Shigella sonnei
—effect of colicinogenic bacteria and colicin, 15
Shigella species
—*B. bacteriovorus* parasitism in, 340
Slime antigen
—of *P. aeruginosa*, 543
Soluble fractions
—of *M. pneumoniae*, 326
Spermine
—effect on reversal of penicillin-induced L phase, 292
Spinal fluid
—distribution of echovirus antibody in, 150
Spleen cells
—multiplication of *P. pseudotuberculosis* in, 631
Squirrels
—susceptibility to *B. hermsii*, 256
Staphylococci
—cell wall-defective forms, 504
—differentiation of phage-nontypable strains, 439
—lysed by group III bacteriophage types, 669
—protein A production related to pathogenicity, 672
—scanning-beam electron microscopy of, 504
—susceptibility to minocycline in vitro, 669
—typing of coagulase-positive strains, 439
Staphylococcus aureus
—cell wall antigens of, 54
—cell wall component affecting phagocytosis of, 750
—comparison of compact and diffuse variants, 523
—fluorescent-antibody reaction with γG-globulin, 387
—immunologically induced resistance to, 757
—intracellular killing of, 750
—penicillinase production by variant strains of, 644
—phagocytosis of, 742
—properties of encapsulated strains of, 528
—role of protein A in immunofluorescence of, 387

Staphylococcus aureus cells
—ability to adsorb human immunoglobulin G, 342
Steroids
—effect on MM virus-infected mice, 426
Streptococci
—lysis by lysozyme, 563
Streptomycin
—inhibition of *M. tuberculosis* by, 479
Synthetic culture medium
—common antigen produced by enteric bacteria grown in, 767

Target-organ pathology
—of non-neuroadapted Western equine encephalitis virus, 533
Teichoic acid component
—of staphylococcal cell walls, 54
Teichoic acids
—effect on phagocytosis of *S. aureus*, 750
Temperature
—effect on response to enteric infection, 274
Tetracycline antibiotics
—effect on aster yellows disease, 201
—effect on aster yellows in insect vectors, 209
Time relationship
—between injection of antigen and adjuvant, 590
Tirandamycin
—inhibition of oxidative phosphorylation by, 82
—inhibition of ribonucleic acid polymerase by, 77
Toxoplasma gondii
—host cell penetration of, 250
Trachoma
—antibody type specificity to, 65
—eye secretions of infants in regions with, 489
Transferrin
—in eye secretions of infants, 489
Transmissible mink encepahlopathy
—failure to demonstrate specific antibody in, 727
Transplacental transmission
—of St. Louis encephalitis virus in mice, 320
Treponema pallidum Kazan 5
—fatty acid composition of, 606
Tuberculosis
—aerosol-induced in primates, 574
—resistance to induced by BCG vaccine, 574
Tumor initiation
—by *A. tumefaciens*, 468
—enhanced by mixtures of strains of *Agrobacterium*, 623
Tumorigenic strains
—of *Agrobacterium*, 623
Tylosin tartrate
—effect on aster yellows in insect vectors, 209
Typhus-group rickettsia
—*R. canada*, 112

Urine
—antibody responses in, 29

Vaccine virus
—for induction of rubella antibodies, 360
Vaccines
—antibody responses in man after administration of, 29
Vaccinia virus
—cellular immunity to, 783
—mice infected with *B. abortus* resistant to, 698
Venezuelan equine encephalomyelitis virus
—cell surface antigen induced by, 713
Vero cell-carrier cultures
—characteristics of, 132
Vibrio cholerae exo-enterotoxin
—monospecific equine antiserum against, 691
Vibriocinogenic bacteria
—induction and immunity in, 519
Vibrios
—adsorption to intestinal surface prevented, 556
Viral infection
—role of steroids in, 426
Virulent cells
—acceptance of R factors by, 516
Virus infection
—means for preventing, 791
—mice infected with *B. abortus* resistant to, 698

Weanling mice
—infected with non-neuroadapted Western equine encephalitis virus, 533
Western equine encephalitis virus
—mice infected with non-neuroadapted strain, 533
White-footed deer mice
—susceptibility to *B. hermsii*, 256
Wood rats
—susceptibility to *B. hermsii*, 256

Yeast phase
—of *P. brasiliensis* compared with mycelial phase, 268

Zygomycetes
—pathogenicity for alloxan-diabetic rabbits, 404
Zygomycosis
—in alloxan-diabetic rabbits, 404

EX OFFICIO

R. E. HUNGATE, President (1970–1971)

MORRIS F. SHAFFER, Vice-President (1970–1971

DONALD E. SHAY, Secretary

T. J. CARSKI, Treasurer

Infection and Immunity, a publication of the American Society for Microbiology, 4715 Cordell Ave., Bethesda, Md. 20014, is devoted to the advancement and dissemination of fundamental knowledge concerning 1) pathogenic microorganisms and infection, 2) ecology, epidemiology, and host factors, 3) antimicrobial agents and chemotherapy, and 4) immunology. *Infection and Immunity* is published monthly, and the twelve numbers are divided into two volumes per year. The subscription price is $15.00 per year to members of the American Society for Microbiology. The non-member subscription price is $36 (foreign, $37) per year. Single copies are $4.00 (foreign, $4.25). Correspondence relating to reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Publications Office, 4715 Cordell Ave., Bethesda, Md. 20014. Correspondence from ASM members relating to membership dues, member subscriptions, changes of address, incorrect address incorrect journals, etc., should be directed to the American Society for Microbiology, 1913 I St., N.W., Washington, D.C. 20006. Nonmembers of the Society should write to The Williams & Wilkins Co., 428 E. Preston St., Baltimore, Md. 21202, regarding institution of nonmember subscriptions and nonreceipt of journals. Published monthly by the ASM at 428 E. Preston St., Baltimore, Md. 21202.

Application to mail at second-class postage rates is pending at Baltimore, Md.
Made in the United States of America.

Volume 2

Contents for July

Number 1

Pathogenic Microorganisms and Infection

Modifying Effect of Colicin on Experimental *Shigella* Keratoconjunctivitis. A. J. STREELMAN, I. S. SNYDER, AND E. W. SIX 15
Deoxyribonucleic Acid Heterogeneity Between Human and Murine Strains of *Chlamydia trachomatis*. E. WEISS, S. SCHRAMEK, N. N. WILSON, AND L. W. NEWMAN 24
Complement in Endotoxin Shock: Effect of Complement Depletion on the Early Hypotensive Phase. A. H. L. FROM, H. GEWURZ, R. P. GRUNINGER, R. J. PICKERING, AND W. W. SPINK 38
Characterization and Comparative Genital Tract Pathogenicity of Bovine Mycoplasmas. R. S. HIRTH, S. W. NIELSEN, AND M. E. TOURTELLOTTE 101
Cytopathic Effects and Ultrastructure of *Mycoplasma agalactiae* var. *bovis* (Donetta Strain). R. S. HIRTH, M. E. TOURTELLOTTE, AND S. W. NIELSEN 105
Toxicity of Pneumococcal Neuraminidase. RICHARD KELLY AND DONALD GREIFF 115
Isolation of a Type 1 Avian Adenovirus (CELO) Mutant Which Was Nonpathogenic for the Chicken Embryo. VANCE J. YATES, DOROTHY FRY, LOUISE T. MILLER, AND V. JASTY 118
Effect of Formalin Treatment on Electrophoretic Mobility of Cholera Toxin. VITO M. ESPOSITO AND JOHN C. FEELEY 120

Ecology, Epidemiology, and Host Factors

Influence of *Brucella* Endotoxins on the Initiation of Antibody-Forming Spleen Cells in Mice Immunized with Sheep Red Blood Cells. GÉRARD RENOUX, MICHELINE RENOUX, AND RÉGINA TINELLI 1
Serum Neutralization Anti-IgG Test for Psittacosis. THOMAS D. WILLIAMS AND NICHOLAS HAHON 7
Measurement of Candidacidal Activity of Specific Leukocyte Types in Mixed Cell Populations. I. Normal, Myeloperoxidase-Deficient, and Chronic Granulomatous Disease Neutrophils. ROBERT I. LEHRER 42
Potentiating Effect of Freund's Adjuvant on Interferon Production by Endotoxin or Poly rI·Poly rC. ERIK DE CLERCQ, MARC R. NUWER, AND THOMAS C. MERIGAN 69
Intranuclear Growth of *Rickettsia canada*, a Member of the Typhus Group. WILLY BURGDORFER AND LYLE P. BRINTON 112

Antimicrobial Agents and Chemotherapy

Tirandamycin: Inhibition of Ribonucleic Acid Polymerase. FRITZ REUSSER 77
Tirandamycin: Inhibition of Oxidative Phosphorylation in Rat Liver Mitochondria. FRITZ REUSSER 82
Uptake of ^{3}H-Dihydrostreptomycin by Macrophages in Culture. PETER F. BONVENTRE AND JOHN G. IMHOFF 89

Immunology

Decreased Growth Capacity of Passaged Gross Virus-Induced Mouse Lymphomas After Incubation with Antithymocytic Sera. DONNA L. VREDEVOE AND ESTHER F. HAYS 11
Antibody Responses in Serum, Secretions, and Urine of Man After Parenteral Administration of Vaccines. STITAYA SIRISINHA AND CHINDA CHARUPATANA 29
Separation of Soluble *Brucella* Antigens by Gel-Filtration Chromatography. JERRY R. MCGHEE AND BOB A. FREEMAN 48
Preparation of Cell Wall Antigens of *Staphylococcus aureus*. J. J. KOWALSKI, DONALD J. TIPPER, AND DAVID T. BERMAN 54
Chlorphenesin: an Antigen-Associated Immunosuppressant. H. Y. WHANG AND E. NETER 60
Antibody Type Specificity to Trachoma in Eye Secretions of Saudi Arab Children. DOROTHY E. MCCOMB AND ROGER L. NICHOLS 65
Responses of the Peyer's Patches in Germ-Free Mice to Antigenic Stimulation. MORRIS POLLARD AND NEHAMA SHARON 96

XUM

Volume 2 Contents for August Number 2

Pathogenic Microorganisms and Infection

Effect of Intramuscular or Intrahepatic Injections of *Clostridium perfringens* on Rabbit Serum Lactate Dehydrogenase. DWAYNE THOMASON 123
Effect of Exogenous Interferon on Rubella Virus Production in Carrier Cultures of Cells Defective in Interferon Production. KUMATO MIFUNE, JAN DESMYTER, AND WILLIAM E. RAWLS 132
Uptake of Cystine by the Yeast Phase of *Histoplasma capsulatum*. BRIAN E. GILBERT AND DEXTER H. HOWARD 139
Incorporation of Cystine by Yeast Cells of *Histoplasma capsulatum*. BRIAN E. GILBERT AND DEXTER H. HOWARD 169
Electron Microscopy of the Phagocytosis of Capsulated *Bacillus anthracis*. M. J. KRAMER AND IVAN L. ROTH 216

Ecology, Epidemiology, and Host Factors

Cellular Responses of Mice to Diffusion Chambers. I. Reactions to Intraperitoneal Diffusion Chambers Containing *Listeria monocytogenes* and to Bacteria-Free Chambers. JOHN W. OSEBOLD, P. M. OUTTERIDGE, L. D. PEARSON, AND R. A. DICAPUA 127
Bactericidal Activity of Human Macrophages: Analysis of Factors Influencing the Killing of *Listeria monocytogenes*. MARTIN J. CLINE 156
Prevention of Experimental Hematogenous and Retrograde Pyelonephritis by Antibodies Against Enterobacterial Common Antigen. GERALD DOMINGUE, ALI SALHI, CARL ROUNTREE, AND WALTER LITTLE 175

Antimicrobial Agents and Chemotherapy

Evidence on Possible Mycoplasma Etiology of Aster Yellows Disease. I. Suppression of Symptom Development in Plants by Antibiotics. R. E. DAVIS AND R. F. WHITCOMB 201
Evidence on Possible Mycoplasma Etiology of Aster Yellows Disease. II. Suppression of Aster Yellows in Insect Vectors. R. F. WHITCOMB AND R. E. DAVIS 209

Immunology

Interactions Between Macrophages of Guinea Pigs and Salmonellae. II. Phagocytosis of *Salmonella typhimurium* by Macrophages of Normal Guinea Pigs. PATRICIA S. WELLS AND H. S. HSU 145
Distribution of Echovirus Antibody in Serum, Nasopharynx, Rectum, and Spinal Fluid After Natural Infection with Echovirus Type 6. PEARAY L. OGRA 150
Nature and Heterogeneity of the Antigens of *Neisseria gonorrhoeae* Involved in the Serum Bactericidal Reaction. A. A. GLYNN AND M. E. WARD 162
Oral Immunization in Experimental Salmonellosis. II. Characteristics of the Immune Response to Temperature-Sensitive Mutants Given by Oral and Parenteral Routes. K. J. FAHEY AND G. N. COOPER 183
Oral Immunization in Experimental Salmonellosis. III. Behavior of Virulent and Temperature-Sensitive Mutant Strains in the Intestinal Tissues of Rats. G. N. COOPER AND K. J. FAHEY 192

Volume 2 Contents for September Number 3

Pathogenic Microorganisms and Infection

Spontaneous and Induced Mutation in *Mycobacterium avium*. CHARLOTTE MCCARTHY .. 223
Isolation and Biological Characterization of *Pasteurella pestis* Endotoxin. JOHNNIE M. ALBIZO AND MICHAEL J. SURGALLA 229

Comparison of Chemical Components of Cell Walls of *Brucella abortus* Strains of Low and High Virulence. GEORGE D. KELLERMAN, J. W. FOSTER, AND F. F. BADAKHSH.. 237
Fractionation of Phenol Extracts from *Brucella suis*: Separation of Multiple Biologically Active Components. JERRY R. MCGHEE AND BOB A. FREEMAN..... 244
Host Cell Penetration of *Toxoplasma gondii*. RAGNAR NORRBY..... 250
Invasiveness of *Salmonella* Administered Orally to Cold-Exposed Mice. JOSEPH J. PREVITE, J. C. ALDEN, M. GAGLIARDI, M. WILLIAM, AND J. SHAMPINE..... 274
Role of Cell Wall Structure of *Salmonella* in the Interaction with Phagocytes. D. FRIEDBERG AND M. SHILO..... 279
Pathogenesis and Transmission of Kilham Rat Virus Infection in Rats. JAMES F. NOVOTNY AND FRANK M. HETRICK..... 298
Experimental Transplacental Transmission of St. Louis Encephalitis Virus in Mice. A. A. ANDERSEN AND R. P. HANSON..... 320
Phagocytosis and Bactericidal Activity of Leukocytes in Hemorrhagic Shock. ARMISTEAD D. WILLIAMS, JR., GERALD L. MANDELL, AND ALLAN M. LEFER..... 345

Ecology, Epidemiology, and Host Factors

Susceptibility of Various Species of Rodents to the Relapsing Fever Spirochete, *Borrelia hermsii*. WILLY BURGDORFER AND ANTHONY J. MAVROS..... 256
Influence of *Bordetella pertussis* on Adenosine Diphosphate-Induced Aggregation of Mouse Platelets. BRENDA S. O'BRYAN AND C. W. FISHEL..... 260
Serological Comparison of the Two Morphological Phases of *Paracoccidioides brasiliensis*. ANGELA RESTREPO-MORENO..... 268
Lipids of Parasitic and Saprophytic Leptospires. R. C. JOHNSON, B. P. LIVERMORE, JUDITH K. WALBY, AND H. M. JENKIN..... 286
Bdellovibrio bacteriovorus Parasitism in *Shigella* Species. J. R. GILLIS AND M. NAKAMURA 340
Ability of *Staphylococcus aureus* Cells to Bind Normal Human Immunoglobulin G. R. VIRGILIO A., C. GONZÁLEZ P., NUBIA MUÑOZ S., AND SILVIA MENDOZA G..... 342

Antimicrobial Agents and Chemotherapy

Reversal of L Phase by Slow Inactivation of Penicillin with Polyamines. E. M. LAPINSKI AND E. D. FLAKAS..... 292

Immunology

Characteristics of the Hemagglutinin Produced During *Plasmodium lophurae* Malaria in Chickens. JAMES T. BARRETT, MARY M. RIGNEY, AND ROBERT P. BREITENBACH... 304
Immunity in Experimental Salmonellosis. I. Protection Induced by Rough Mutants of *Salmonella typhimurium*. R. GERMANIER..... 309
Lipid Composition of the Hemagglutinating Active Fraction Obtained from Chick Embryos Infected with *Chlamydia psittaci* 6BC. HOWARD M. JENKIN, SHIGERU MAKINO, DEWAYNE TOWNSEND, MARIA C. RIERA, AND ALMEN L. BARRON..... 316
Isolation, Characterization, and Immunogenicity of *Mycoplasma pneumoniae* Membranes. J. DENNIS POLLACK, NORMAN L. SOMERSON, AND LAURENCE B. SENTERFIT.. 326
Polysaccharides of *Mycobacterium bovis* Ushi 10, *Mycobacterium smegmatis*, *Mycobacterium phlei*, and Atypical *Mycobacterium* P1. ICHIRO AZUMA, MUTSUYA AJISAKA, AND YUICHI YAMAMURA..... 347

Volume 2 **Contents for October** **Number 4**

Pathogenic Microorganisms and Infection

Immunofluorescence Studies on the Pathogenesis of Intestinal Chlamydial Infections in Calves. A. K. EUGSTER, B. K. JOYCE, AND J. STORZ..... 351
Experimental Cerebral Zygomycosis in Alloxan-Diabetic Rabbits. I. Relationship of Temperature Tolerance of Selected Zygomycetes to Pathogenicity. DONALD J. REINHARDT, WILLIAM KAPLAN, AND LIBERO AJELLO..... 404

XUM

Effect of Estrogen and Other Steroids on MM Virus Infection in Mice. DAVID J. GIRON AND PATTON T. ALLEN 426
Growth and Pathogenesis of *Mycoplasma mycoides* var. *capri* in Chicken Embryo Tracheal Organ Cultures. J. D. CHERRY AND D. TAYLOR-ROBINSON 431
Enhancement of *Agrobacterium tumefaciens* Infectivity by Chlorpromazine Hydrochloride. GARY T. HEBERLEIN 468
Rapid Detection of Bacteremia in Mice by Gas Chromatography. B. M. MITRUKA, A. M. JONAS, AND M. ALEXANDER 474
Scanning-Beam Electron Microscopy of Cell Wall-Defective Staphylococci. ROBERT J. FASS, JUDITH CARLETON, CHATRCHAI WATANAKUNAKORN, ALBERT S. KLAINER, AND MORTON HAMBURGER 504
Virulence of R-Factor-Bearing *Salmonella typhimurium*. ELIZABETH H. THIELE 516

Ecology, Epidemiology, and Host Factors

Inhibition of *Shigella flexneri* by the Normal Intestinal Flora. III. Interactions with *Bacteroides fragilis* Strains In Vitro. DAVID J. HENTGES AND BRUCE R. MAIER 364
Efficiency of Various Intestinal Bacteria in Assuming Normal Functions of Enteric Flora After Association with Germ-Free Mice. SALAM A. SYED, GERALD D. ABRAMS, AND ROLF FRETER 376
Role of Protein A in Nonspecific Immunofluorescence of *Staphylococcus aureus*. ARNE FORSGREN AND URBAN FORSUM 387
Typing of Coagulase-Positive Staphylococci by Proteolytic Activity on Buffered Caseinate-Agar, with Special Reference to Bacteriophage Nontypable Strains. F. G. MARTLEY, AUDREY W. JARVIS, D. F. BACON, AND R. C. LAWRENCE 439
Plaque Reduction Technique for Demonstrating Neutralizing Antibodies for *Chlamydia*. J. BANKS, B. EDDIE, M. SUNG, N. SUGG, J. SCHACHTER, AND K. F. MEYER 443
Effect of Anti-Kupffer Cell Serum on Phagocytosis and Humoral Antibody Formation. J. C. PISANO AND N. R. DI LUZIO 448
Immunoglobulins, Secretory Component, and Transferrin in Eye Secretions of Infants in Regions With and Without Endemic Trachoma. J. DENNIS MULL, JOHN H. PETERS, AND ROGER L. NICHOLS 489

Antimicrobial Agents and Chemotherapy

Effect of Mg^{2+} and Ethylenediaminetetraacetate on the In Vitro Activity of Coumermycin A_1 and Novobiocin Against Gram-Negative Bacteria. R. CLEELAND, G. BESKID, AND E. GRUNBERG 371
Role of the Phagocyte in Host-Parasite Interactions. XXIV. Aldehyde Generation by the Myeloperoxidase-H_2O_2-Chloride Antimicrobial System: a Possible In Vivo Mechanism of Action. B. B. PAUL, A. A. JACOBS, R. R. STRAUSS, AND A. J. SBARRA 414
Growth Inhibition of *Mycobacterium tuberculosis* After Single-Pulsed Exposures to Streptomycin, Ethambutol, and Rifampin. WILLIAM H. BEGGS AND JOHN W. JENNE 479
Further In Vitro Studies with 5-Fluorocytosine. SMITH SHADOMY 484

Immunology

Fluorescent-Antibody Marker for Vaccine-Induced Rubella Antibodies. GORDON C. BROWN AND THERESA P. O'LEARY 360
Physicochemical Properties of *Neisseria meningitidis* Group C and Y Polysaccharide Antigens. MICHAEL A. APICELLA AND JOHN A. ROBINSON 392
Immune Response in Preleukemic Mice. MANUEL FREY-WETTSTEIN AND ESTHER F. HAYS 398
Immunological Response of Rodents to Murine Mycoplasmas. B. C. COLE, L. GOLIGHTLY-ROWLAND, J. R. WARD, AND B. B. WILEY 419
Biological Activities of Rabbit Immunoglobulin M and Immunoglobulin G Antibodies to *Pseudomonas aeruginosa*. ANN B. BJORNSON AND J. GABRIEL MICHAEL 453
Histamine-Releasing Factor Generated by the Interaction of Endotoxin with Hamster Serum. WILLIAM A. HOOK, RALPH SNYDERMAN, AND STEPHAN E. MERGENHAGEN .. 462
Agar-Gel Precipitating Antibody in *Pseudomonas aeruginosa* Infections. LOWELL S. YOUNG, BESSIE H. YU, AND DONALD ARMSTRONG 495

Induction and Immunity in Vibriocinogenic Bacteria. ASOKA JAYAWARDENE AND HANNAH FARKAS-HIMSLEY 519

Volume 2 Contents for November Number 5

Pathogenic Microorganisms and Infection

Comparison of Compact and Diffuse Variants of Strains of *Staphylococcus aureus*. KOSAKU YOSHIDA AND YOSHIO TAKEUCHI 523
Pathological Changes in Brain and Other Target Organs of Infant and Weanling Mice After Infection with Non-Neuroadapted Western Equine Encephalitis Virus. MARY JANE AGUILAR 533
Lysis of Grouped and Ungrouped Streptococci by Lysozyme. S. E. COLEMAN, IVO VAN DE RIJN, AND A. S. BLEIWEIS 563
Correlation Between Pathogenicity of *Shigella* and Intraperitoneal Survival in Mice. MITSURU NAKAMURA, KATHLEEN E. JACKSON, AND W. R. CROSS 570
In Vivo Studies with the Partially Purified Protease (Elastase) from *Pseudomonas aeruginosa*. GERALDINE MEINKE, JOANNE BARUM, BARBARA ROSENBERG, AND RICHARD BERK 583
Intracellular *Pasteurella pseudotuberculosis*: Multiplication in Cultured Spleen and Kidney Cells. MARVIS RICHARDSON AND TAMAR K. HARKNESS 631
Significance of Protein A Production by Staphylococci. ARNE FORSGREN 672
Mouse Virulence of Human, Systemic, Pathogenic *Escherichia coli* Strains. ARVID L. ERLANDSON 674
Amino Acid Analysis of the Isolated and Purified Components from Crystalline Toxin of *Clostridium botulinum* Type A. DANIEL A. BOROFF, H. PAUL MELOCHE, AND BIBHUTI R. DASGUPTA 679
In Vitro Plaque Formation by Several Oral Diphtheroids Implicated in Periodontal Disease. G. J. HAGEAGE, JR., I. JOHANSSEN, AND J. M. TANZER 683
Specificity of Diphtheria Toxin Action on Heart and Muscle Tissues of Guinea Pigs. C. G. BOWMAN, J. G. IMHOFF, AND P. F. BONVENTRE 686

Ecology, Epidemiology, and Host Factors

Mechanism of Action of Intestinal Antibody in Experimental Cholera. II. Antibody-Mediated Antibacterial Reaction at the Mucosal Surface. ROLF FRETER 556
Drug Potentiation of Macrophage Function. MARTIN J. CLINE 601
Lipids of *Treponema pallidum* Kazan 5. RUSSELL C. JOHNSON, BRIAN P. LIVERMORE, HOWARD M. JENKIN, AND LAURA EGGEBRATEN 606
Enhanced Tumor Initiation by Mixtures of Tumorigenic and Nontumorigenic Strains of *Agrobacterium*. JAMES A. LIPPINCOTT AND BARBARA B. LIPPINCOTT 623
Lymphocyte Transformation in Repeated Gonococcal Urethritis. STEPHEN J. KRAUS, GOLDIE H. PERKINS, AND RUTH C. GELLER 655

Antimicrobial Agents and Chemotherapy

Relationship Between β-Lactamase Activity and Resistance of *Enterobacter* to Cephalothin. W. EDMUND FARRAR, JR., AND JANE M. KRAUSE 610
Penicillinase Studies on L-Phase Variants, G-Phase Variants, and Reverted Strains of *Staphylococcus aureus*. HAROLD J. SIMON AND ELAINE JONG YIN 644
Susceptibility of Staphylococci to Minocycline In Vitro: Identification of Group III Bacteriophage Types by Characteristic Inhibition of Growth. JOHN P. PHAIR AND JUDITH CARLETON 669
Failure of Antrycide in Treatment of Leptospirosis in Experimentally Infected Hamsters. G. MAGHAMI, S. GREEN, AND L. B. EVANS 681

Immunology

Biological and Immunological Properties of Encapsulated Strains of *Staphylococcus aureus* from Human Sources. KOSAKU YOSHIDA, MELVIN R. SMITH, AND YOSHIKO NAITO 528

XUM

Purification and Chemical Composition of the Protective Slime Antigen of *Pseudomonas aeruginosa*. PASQUALE F. BARTELL, THOMAS E. ORR, AND BOHDANNA CHUDIO 543
Effect of Alkali on the Immunological Reactivity of Lipopolysaccharide from *Salmonella typhimurium*. IVAN ČIŽNÁR AND J. W. SHANDS, JR. 549
Aerosol-Induced Tuberculosis in Subhuman Primates and the Course of the Disease After Intravenous BCG Vaccination. W. R. BARCLAY, R. L. ANACKER, W. BREHMER, W. LEIF, AND E. RIBI 574
Time Relationships Between Injection of Antigen and Adjuvant. I. Adjuvancy of *Bordetella pertussis* Given at Various Times Before the Primary Antigenic Stimulus. H. FINGER, M. BARTOSCHEK, AND P. EMMERLING 590
Antibody in Cattle Experimentally Infected with Contagious Bovine Pleuropneumonia. T. L. BARBER, S. S. STONE, AND P. D. DELAY 617
Pilot-Scale Production of Group A and Group C Meningococcal Polysaccharide Immunogens. SANFORD BERMAN, PATRICIA L. ALTIERI, ALBERT GROFFINGER, AND JOSEPH P. LOWENTHAL 640
Immunogenic Mycobacterial Ribosomal and Ribonucleic Acid Preparations: Chemical and Physical Characteristics. ANNE S. YOUMANS AND GUY P. YOUMANS 659
Enhanced Immunogenicity of Altered Encephalitogenic Protein. ROBERT H. SWANBORG AND CYNTHIA V. RADZIALOWSKI 676

Volume 2 Contents for December Number 6

Pathogenic Microorganisms and Infection

* Accelerated Cytopathology in HeLa Cells Induced by Reovirus and Cycloheximide. PHILIP C. LOH, HERBERT K. OIE, AND R. M. T. RATNAYAKE 705
Failure of Immune Sera to Enhance Significantly Phagocytosis of *Staphylococcus aureus*: Nonspecific Adsorption of Phagocytosis-Promoting Factors. MEHDI SHAYEGANI 742
Cell Wall Component Which Affects the Ability of Serum to Promote Phagocytosis and Killing of *Staphylococcus aureus*. MEHDI SHAYEGANI, KAZUHITO HISATSUNE, AND STUART MUDD 750
* Experimental Infection of Monkeys with Bunyamwera and Germiston Viruses. ANTHONY SCHWARTZ AND WILLIAM P. ALLEN 762

Ecology, Epidemiology, and Host Factors

* Interferon Induction and Resistance to Virus Infection in Mice Infected with *Brucella abortus*. A. BILLIAU, E. SCHONNE, L. EYCKMANS, AND P. DE SOMER 698
* Seroepidemiological and Ecological Studies of the Adenovirus-Associated Satellite Viruses. WADE P. PARKS, D. WARK BOUCHER, JOSEPH L. MELNICK, LARRY H. TABER, AND MARTHA D. YOW 716
* Interferon Induction by the Psittacosis Agent in Guinea Pig Leukocyte Cultures. EDMUND H. KOZIKOWSKI AND NICHOLAS HAHON 731
* Secretory Immunoglobulin A and Herpes Keratitis. Y. M. CENTIFANTO AND H. E. KAUFMAN 778
Factors Affecting the Transmission of *Salmonella* by Flies: Natural Resistance to Colonization and Bacterial Interference. BERNARD GREENBERG, JOHN A. KOWALSKI, AND MARC J. KLOWDEN 800

Antimicrobial Agents and Chemotherapy

* Sensitivity of Types 1 and 2 Herpes Simplex Virus to 5-Iodo-2′-Deoxyuridine and 9-β-D-Arabinofuranosyladenine. DONALD A. PERSON, PHILLIP J. SHERIDAN, AND ERNEST C. HERRMANN, JR. 815

Immunology

Monospecific Equine Antiserum Against Cholera Exo-Enterotoxin. RICHARD A. FINKELSTEIN 691

* Cell Surface Antigen Induced by Venezuelan Equine Encephalomyelitis Virus. NICHOLAS HAHON 713
* Increased Incidence of Lymphoma in C3H/HeJ Adult Mice Injected with Gross Virus and Antithymocytic Serum. DONNA L. VREDEVOE AND ESTHER F. HAYS 723
* Failure to Demonstrate Specific Antibody in Transmissible Mink Encephalopathy. R. F. MARSH, I. C. PAN, AND R. P. HANSON 727
* Experimentally Induced Alterations in Antigenic Properties of an Arbovirus Serotype. J. R. HENDERSON AND Y. HOSHINO 735
Immunologically Induced and Elicited Local Resistance to *Staphylococcus aureus*. JAMES H. TAUBLER, MARLYNN GRIEB, AND STUART MUDD 757
Production of Common Antigen by Enteric Bacteria Grown in a Synthetic Culture Medium. EUGENE GORZYNSKI AND ERWIN NETER 767
Studies on Immunity in Anthrax. XII. Requirement for Phosphate for Elaboration of Protective Antigen and Its Partial Replacement by Charcoal. GEORGE G. WRIGHT, LORELL H. ANGELETY, AND BEATRICE SWANSON 772
* In Vitro Assessment of Cellular Immunity to Vaccinia Virus: Contribution of Lymphocytes and Macrophages. W. A. F. TOMPKINS, J. M. ZARLING, AND W. E. RAWLS .. 783
* Immobilization of Antiviral Antibody at the Cell Surface: a Novel Means for Preventing Virus Infection. WAYNE E. MAGEE 791
Effect of Antimacrophage Serum on Dermal Tuberculin Sensitivity and Allergic Pulmonary Granuloma Formation in Rabbits. V. L. MOORE AND Q. N. MYRVIK 810

* Papers Relating to Virology.
